Table of Contents

1.0 Introduction 3
2.0 Application Code 4
2.1 Web Application Code 4

1.0 Introduction

This document is developed to display all codes written to implement the qLotto software suite. The software code will be structurally presented in such a way that it depicts the logical groups of code files in Modules, Components and Libraries.

Also, screen-dumps from system runs would thereafter be presented. The entire codebase for the software suite is hosted online at my GitHub repository – https://github.com/Eb0nY14/E-ScratchCard.git

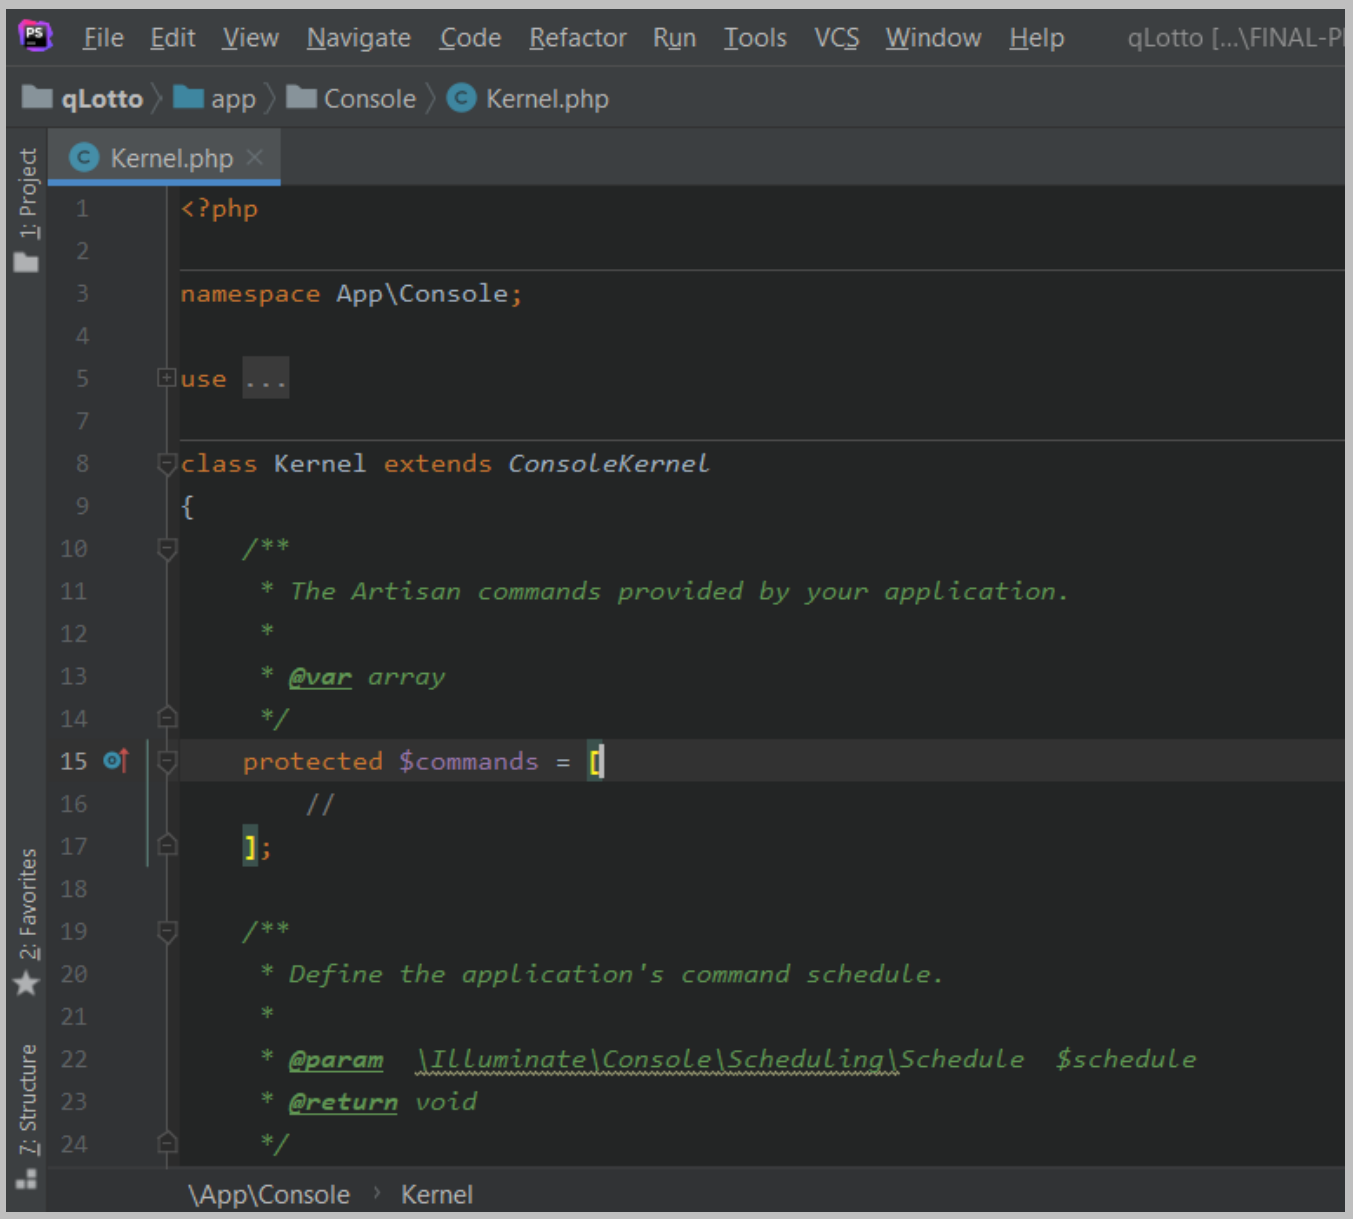
2.0 Application Code

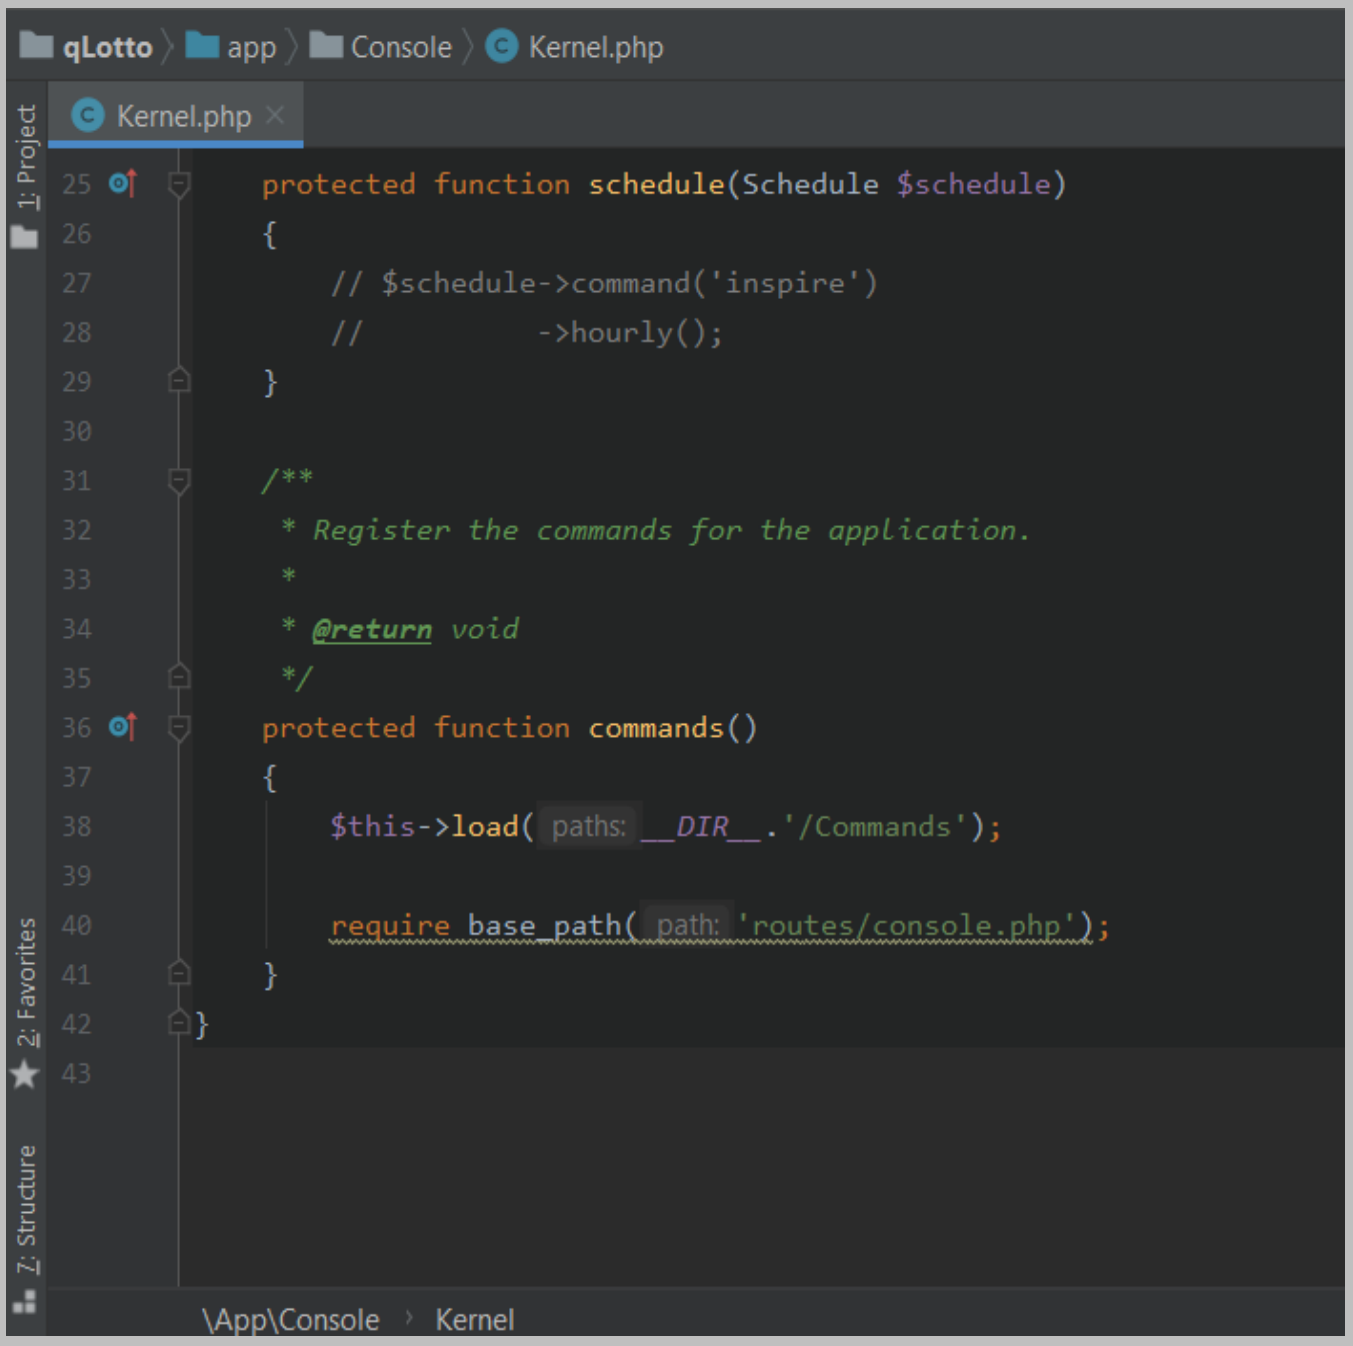
2.1 Web Application Code

app folder: This is a folder that contains all the application files for this project. The path for each file in this folder and the actual code are shown below:

Kernel.php: This handles the artisan commands provided by the application. It defines the application's command schedule and registers the command for the application.

The file is located at: app > Console > Kernel.php





qLotto

}
}

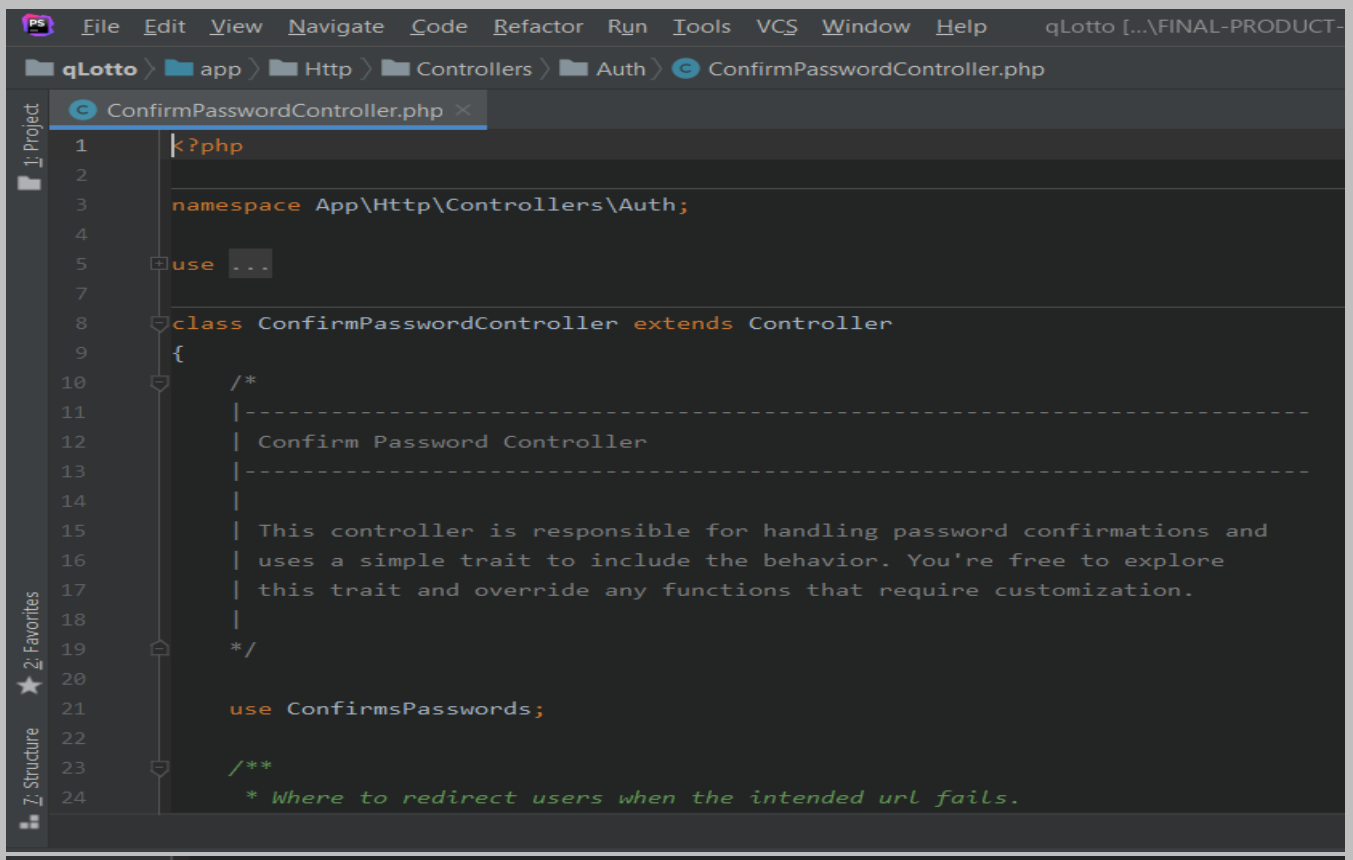
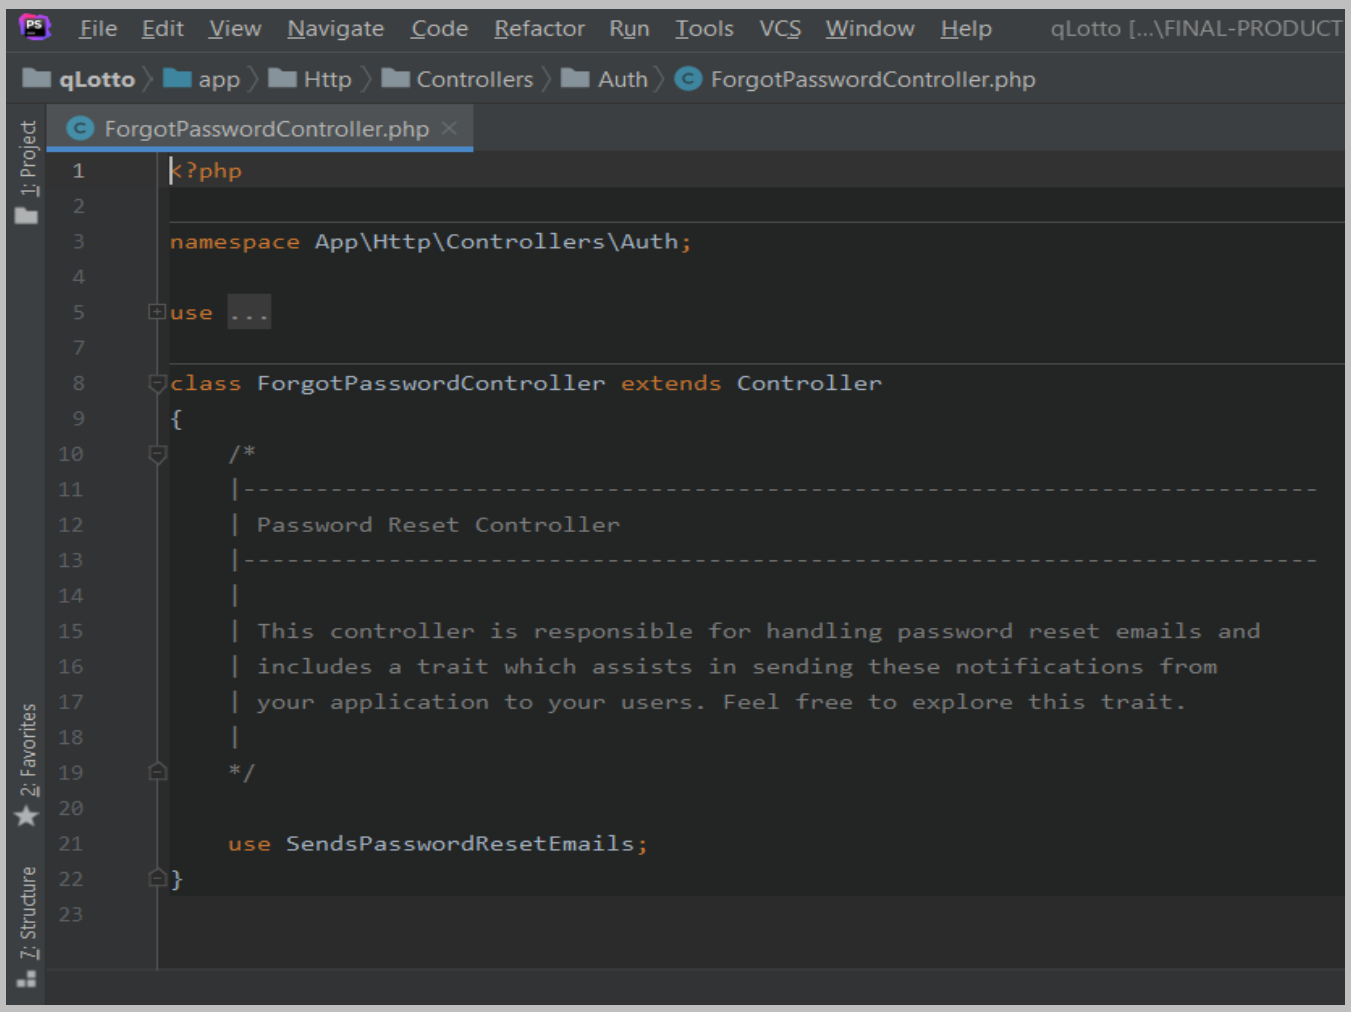
ConfirmPasswordController.php: This piece of code acts as a controller that handles password confirmations.

The file is located at: app > Http > Controllers > Auth > ConfirmPasswordController.php



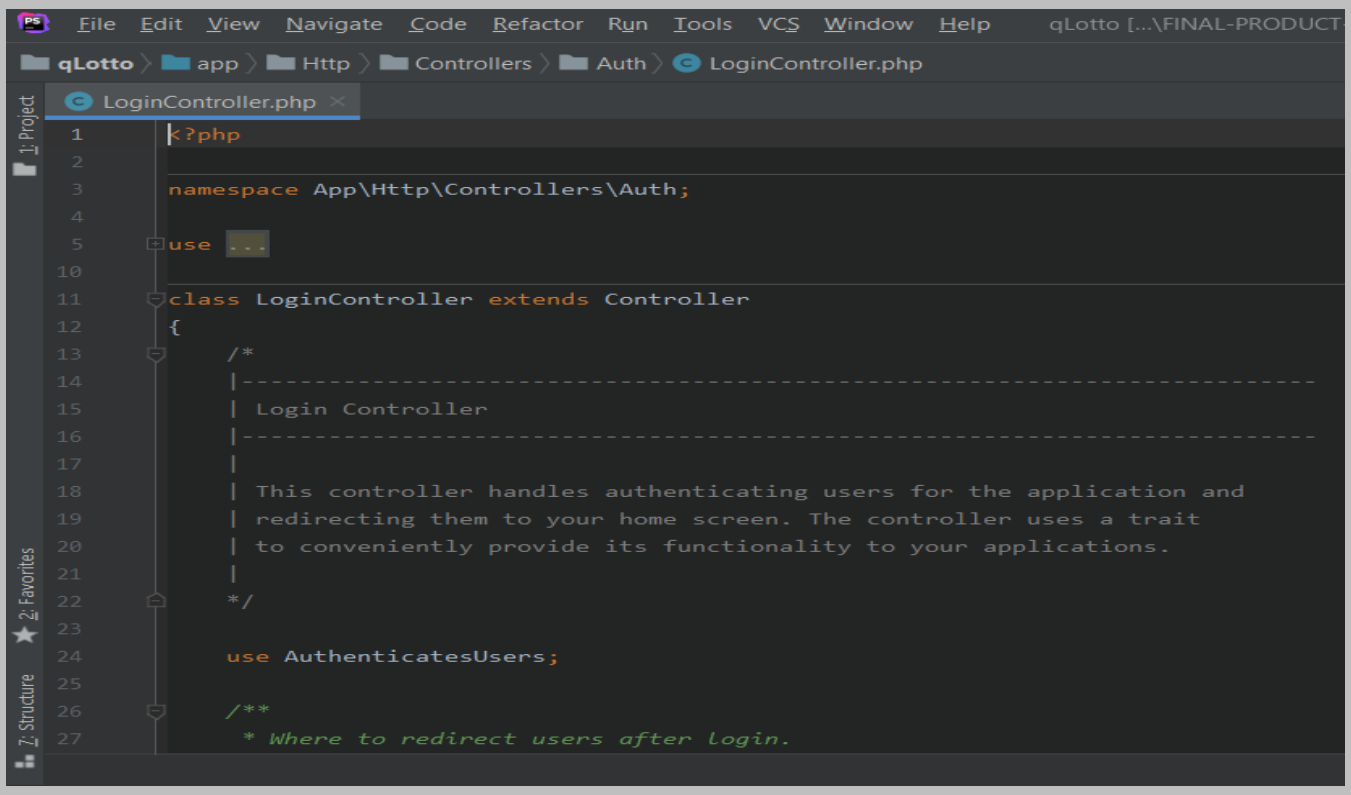
ForgotPasswordController.php: This piece of code acts as a controller that handles password reset emails and sends these notifications from the application to users.

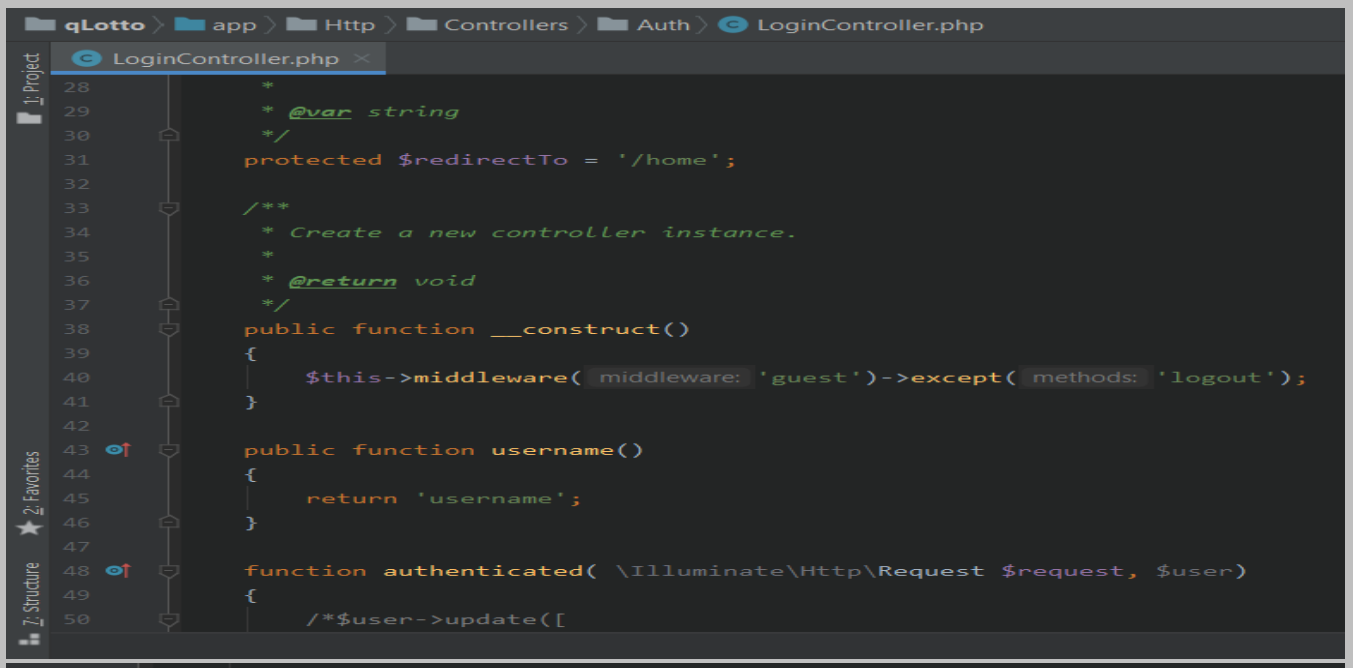
The file is located at: app* > Http > Controllers > Auth > *ForgotPasswordController.php



LoginController.php: This piece of code acts as a controller that handles authentication of users and redirects them to the home screen after a successful authentication.

The file is located at: app* > Http > Controllers > Auth > *LoginController.php

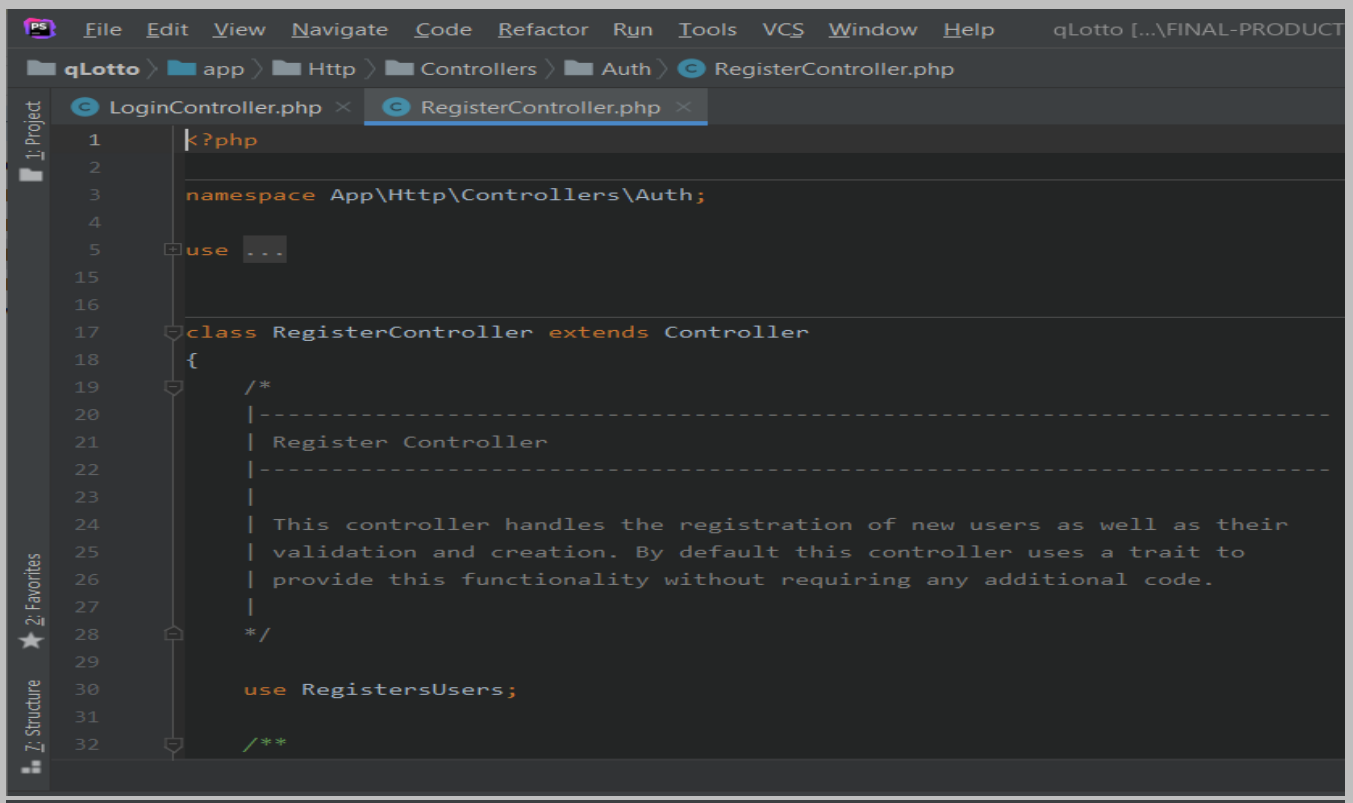


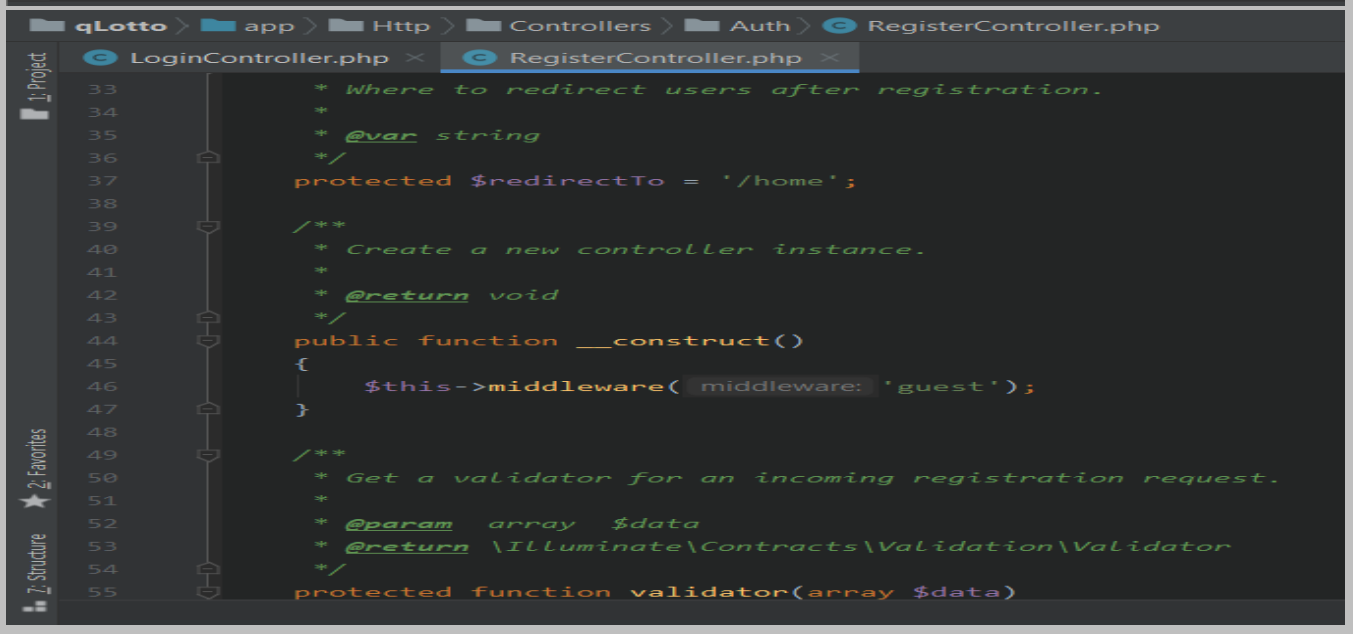


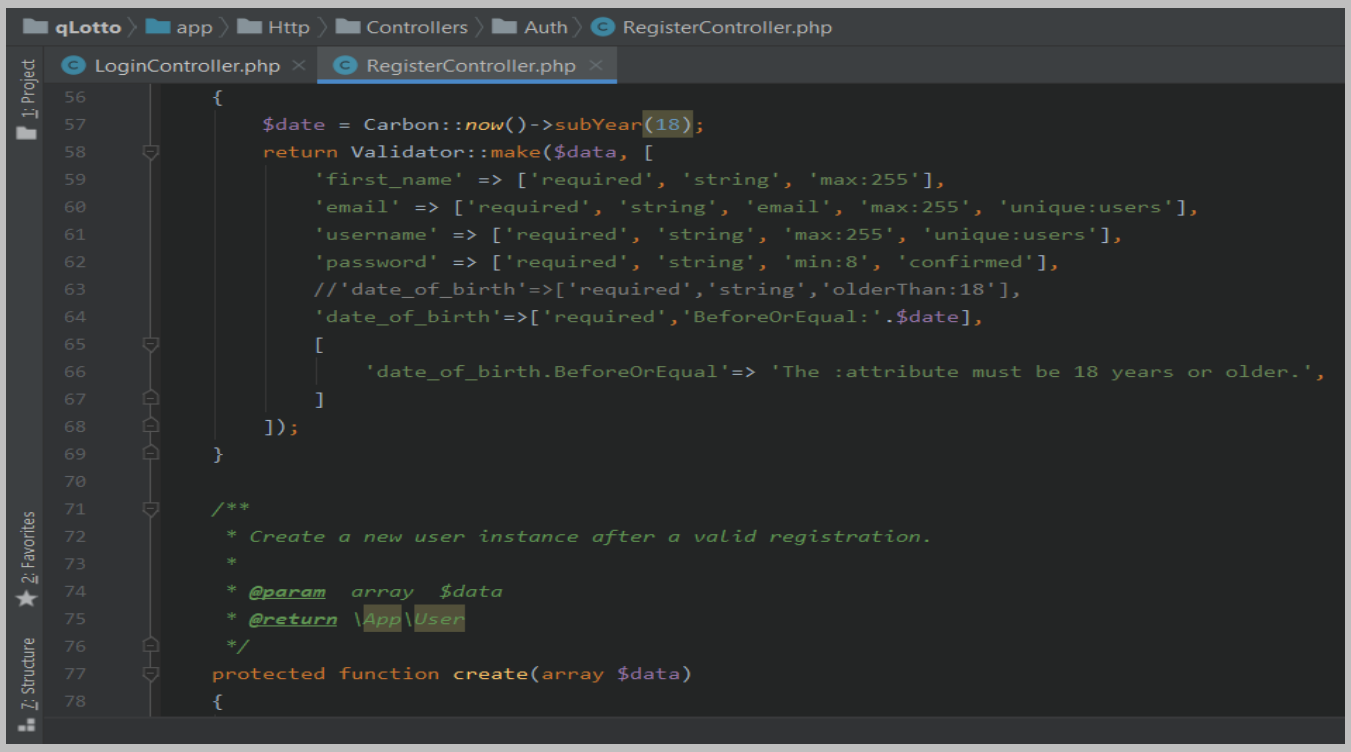
```
            'last_login_at' => Carbon::now()->toDateTimeString(),
            'last_login_ip' => $request->getClientIp()
        ]);*/
        Syslog::create([
            'user_id'=> Auth::user()->id,
            'log_type'=>'Login',
            'activity'=>'Successful login attempt',
            'user_ip'=>$request->getClientIp()
        ]);
    }
}
```

RegisterController.php: : This piece of code acts as a controller that handles the registration of new users including their creation and validation.

The file is located at: app > Http > Controllers > Auth > RegisterController.php







qLotto app Http Controllers Auth RegisterController.php

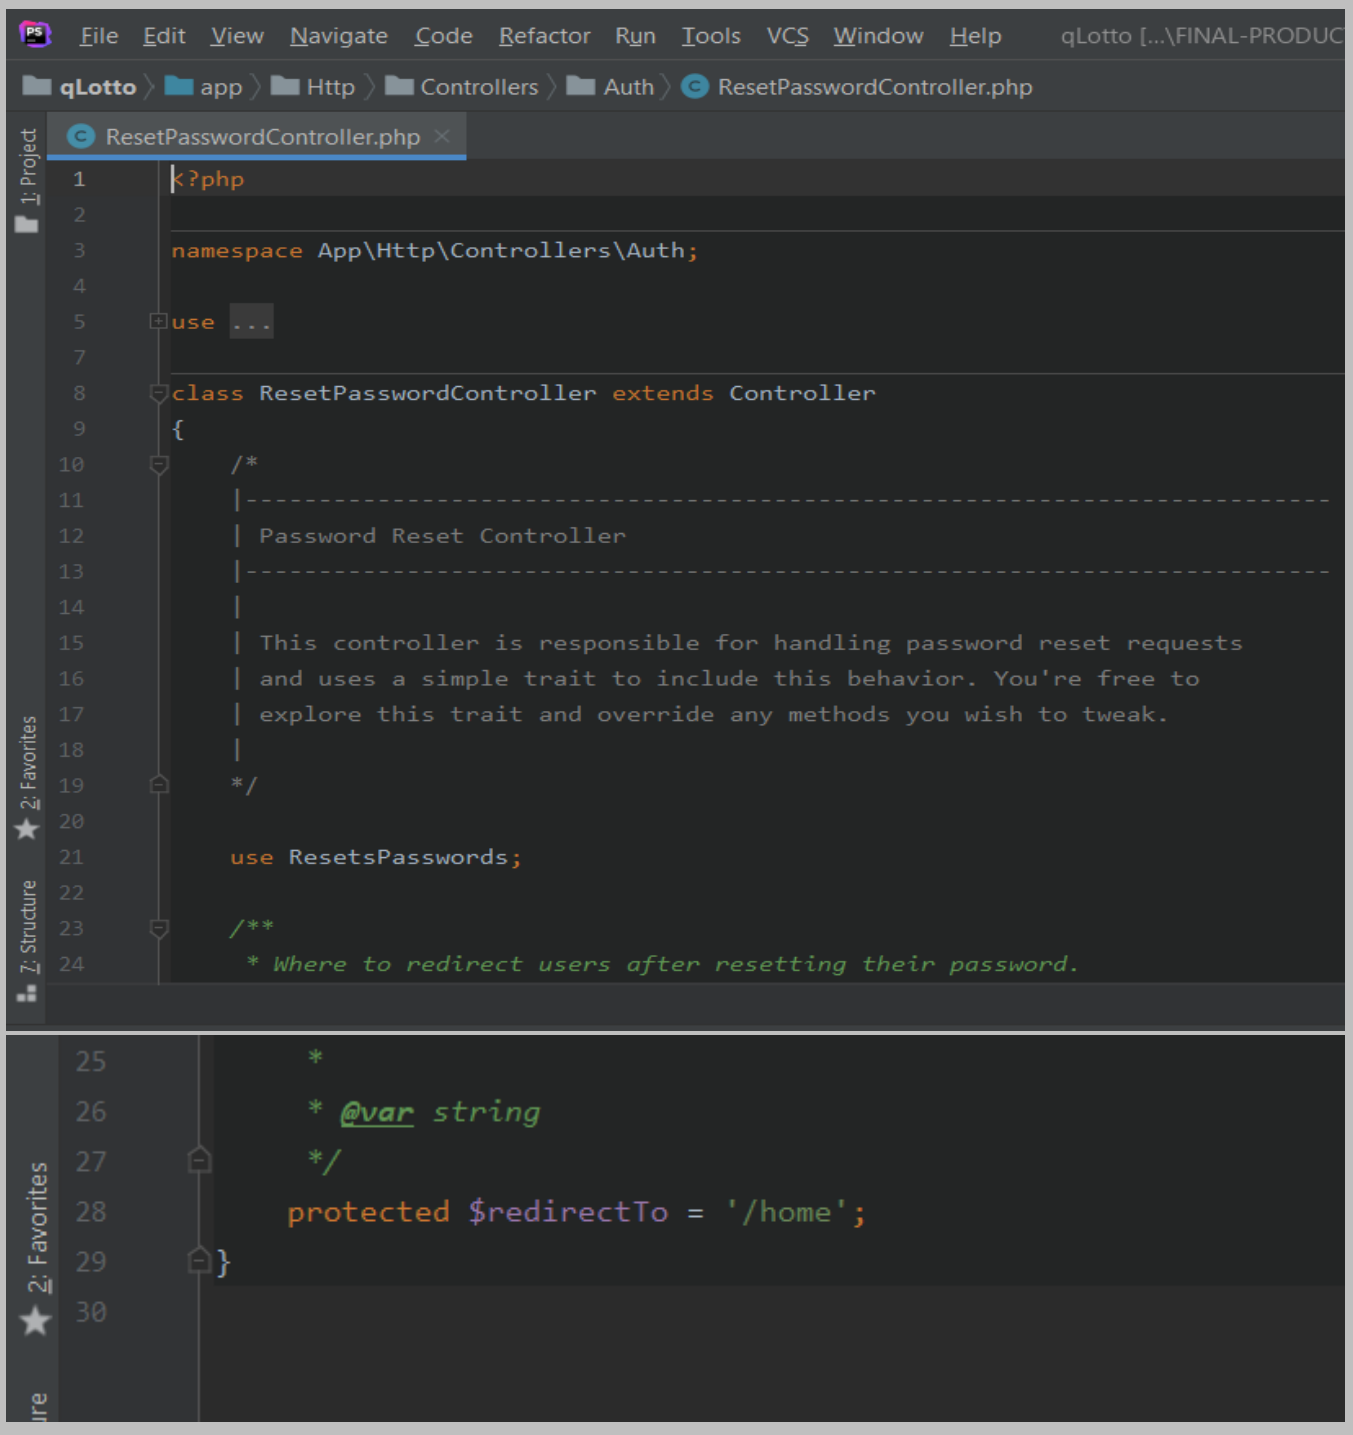
return $user;
}
}

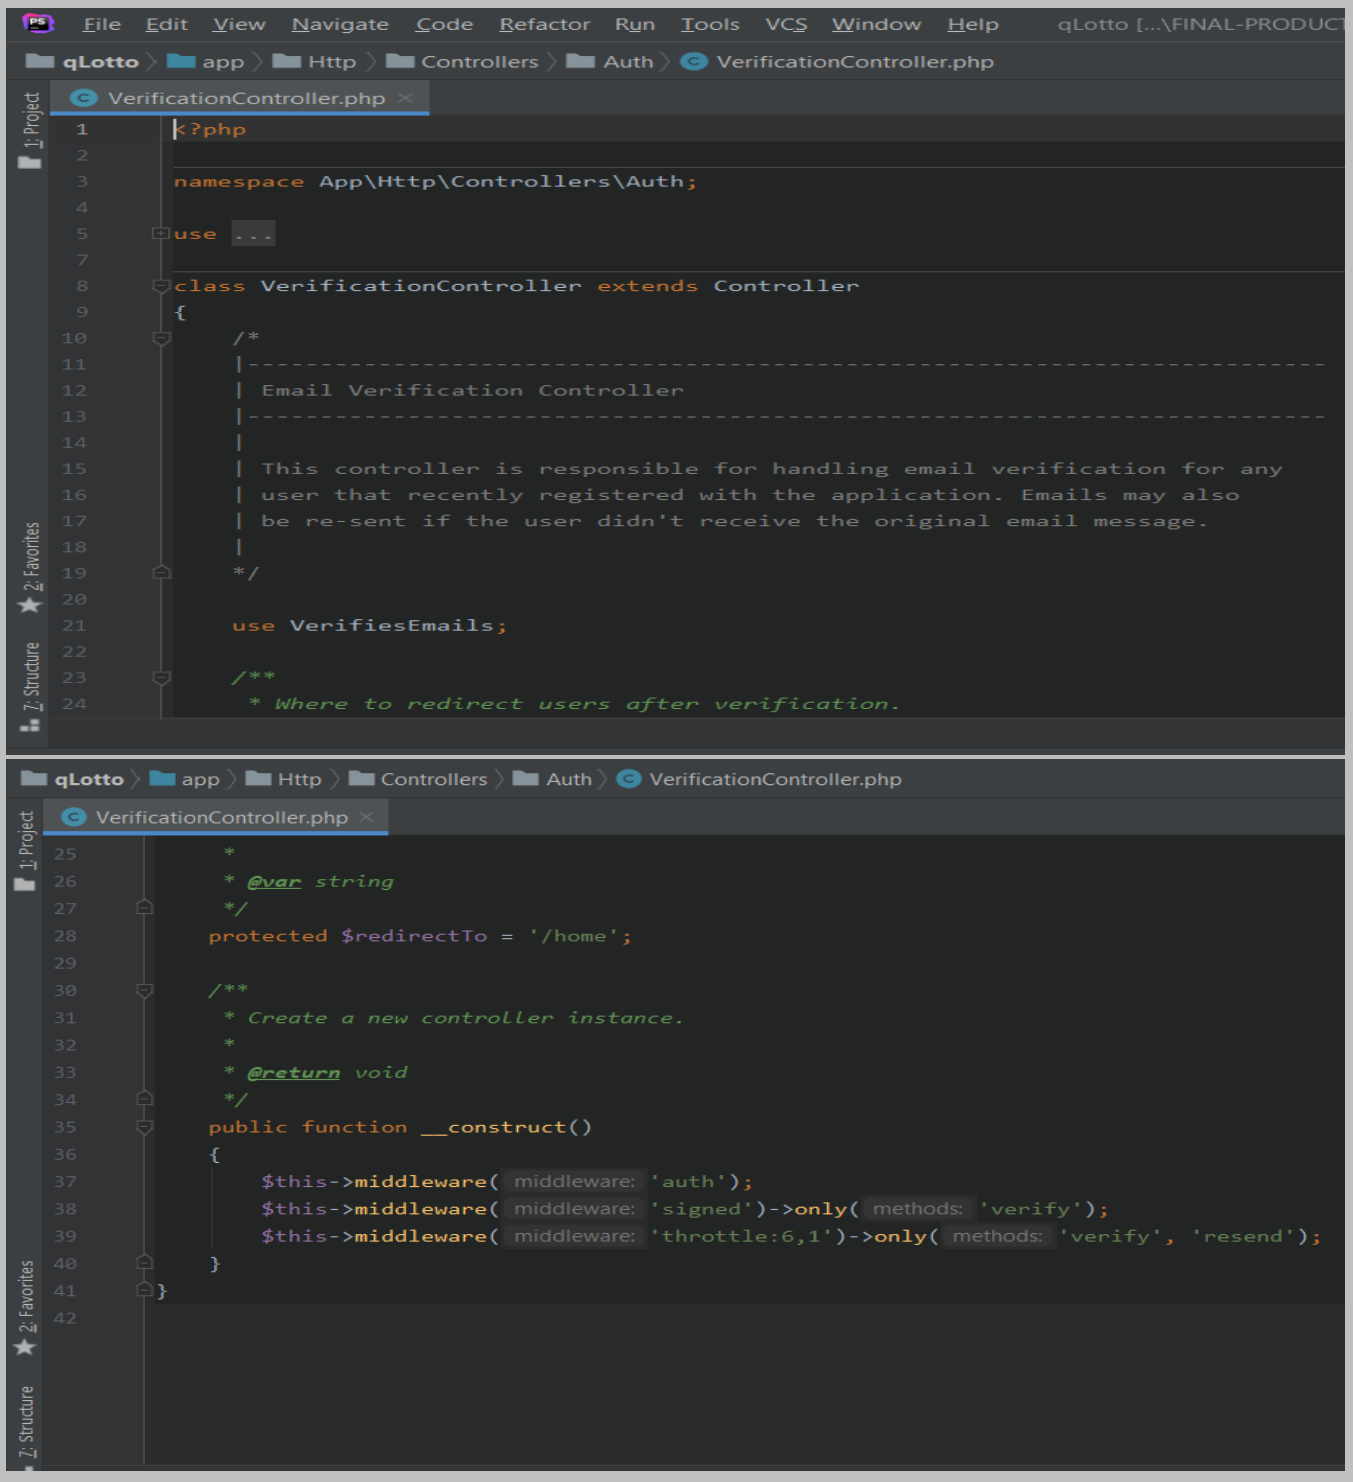
ResetPasswordController.php: This piece of code acts as a controller that handles password reset requests.

The file is located at: app > Http > Controllers > Auth > ResetPasswordController.php



VerificationController.php: This piece of code acts as a controller that handles email verification for any user that just registered with the application and also deals with re-sending emails if the user did not receive the original message.

The file is located at: app > Http > Controllers > Auth > VerificationController.php



```
<?php

namespace App\Http\Controllers\Auth;

use ...

class VerificationController extends Controller
{
    /*
    |--------------------------------------------------------------------------
    | Email Verification Controller
    |--------------------------------------------------------------------------
    |
    | This controller is responsible for handling email verification for any
    | user that recently registered with the application. Emails may also
    | be re-sent if the user didn't receive the original email message.
    |
    */

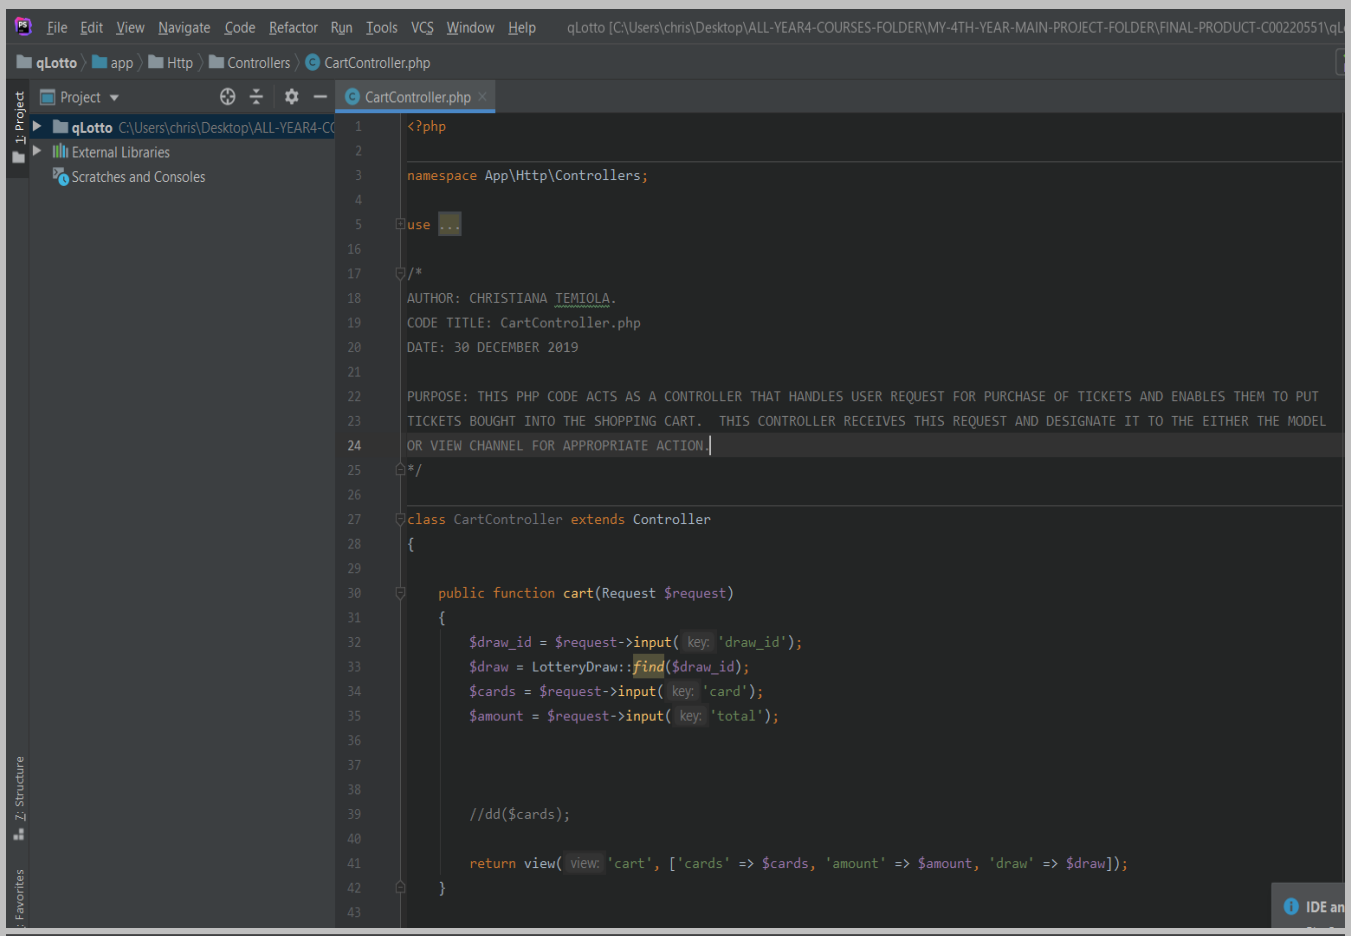
    use VerifiesEmails;

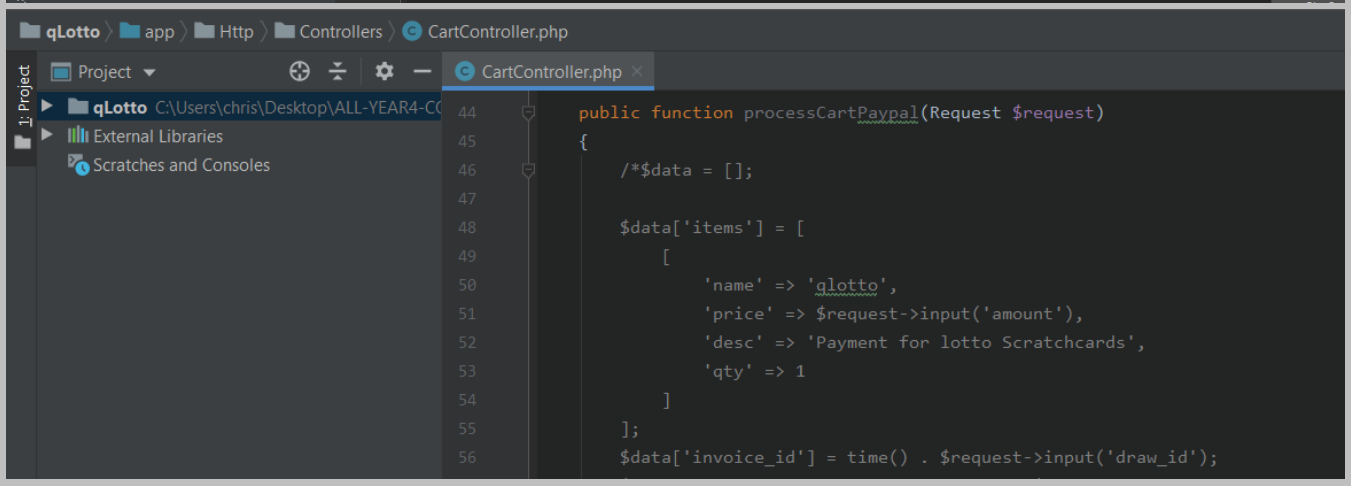
    /**
     * Where to redirect users after verification.
     *
     * @var string
     */
    protected $redirectTo = '/home';

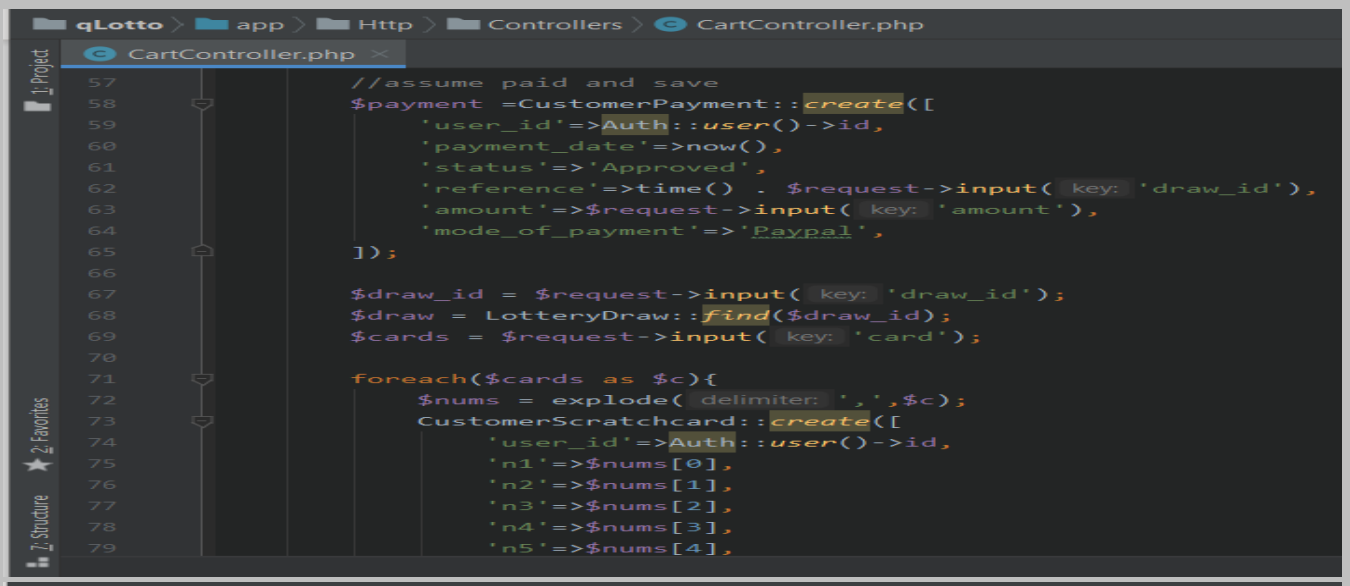
    /**
     * Create a new controller instance.
     *
     * @return void
     */
    public function __construct()
    {
        $this->middleware( middleware: 'auth');
        $this->middleware( middleware: 'signed')->only( methods: 'verify');
        $this->middleware( middleware: 'throttle:6,1')->only( methods: 'verify', 'resend');
    }
}
```

CartController.php: This piece of code acts as a controller that handles shopping cart display after a user has purchased scratch card tickets and is ready to check out and make payment. It accepts this requests and designate it to the appropriate channel for either processing(Model layer) and/or display(View layer).

This code WAS WRITTEN BY ME and is located at: app > Http > Controllers > CartController.php







```
qLotto > app > Http > Controllers > CartController.php
CartController.php

57              //assume paid and save
58              $payment =CustomerPayment::create([
59                  'user_id'=>Auth::user()->id,
60                  'payment_date'=>now(),

```

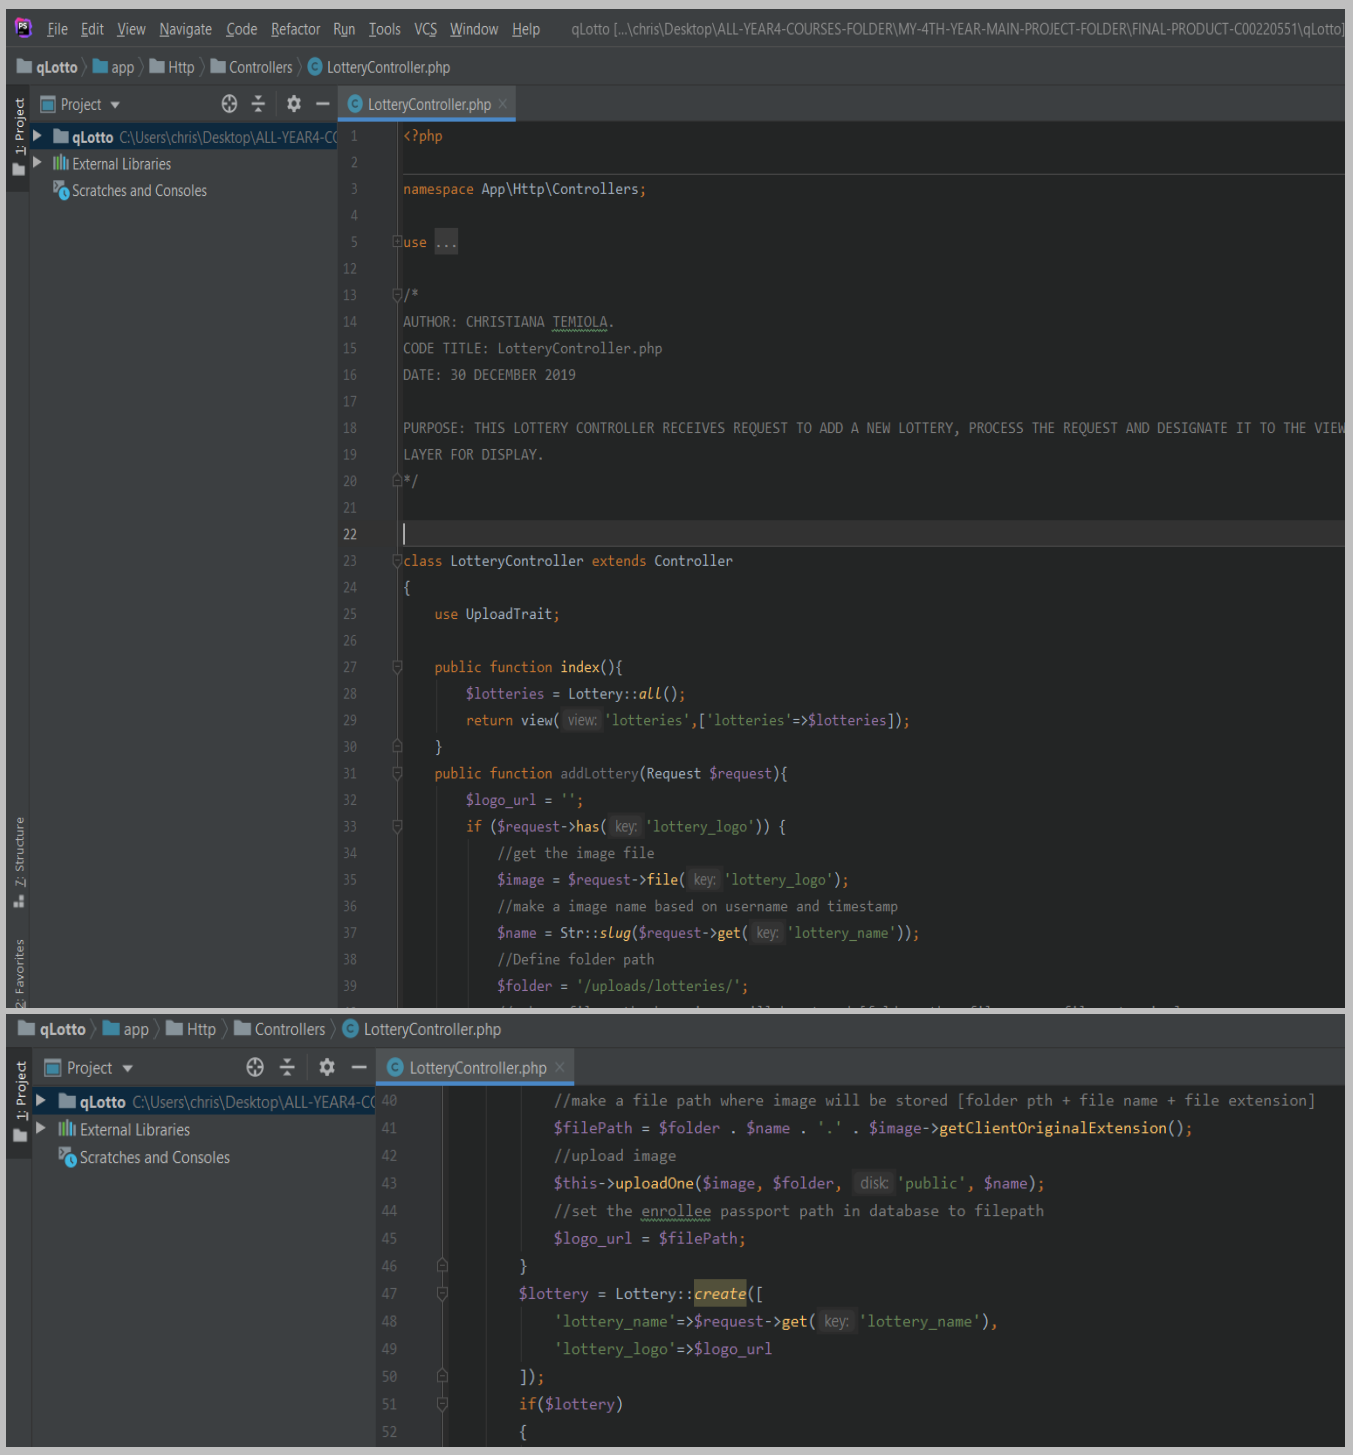
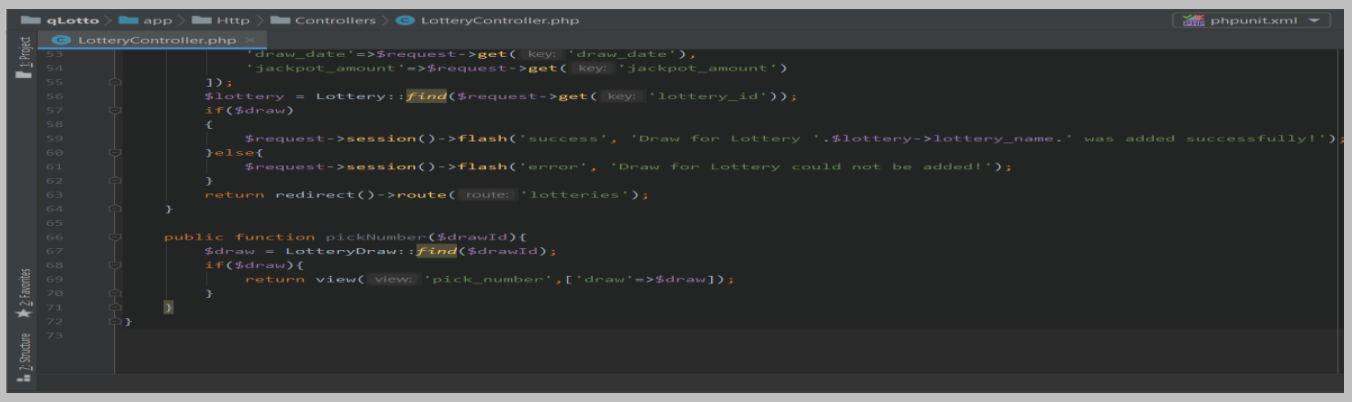
LotteryController.php: This controller handles user request to add/create a new lottery, it designates the Create part of CRUD operation to the model layer and afterwards delegates the Read part of CRUD operation to the view layer.

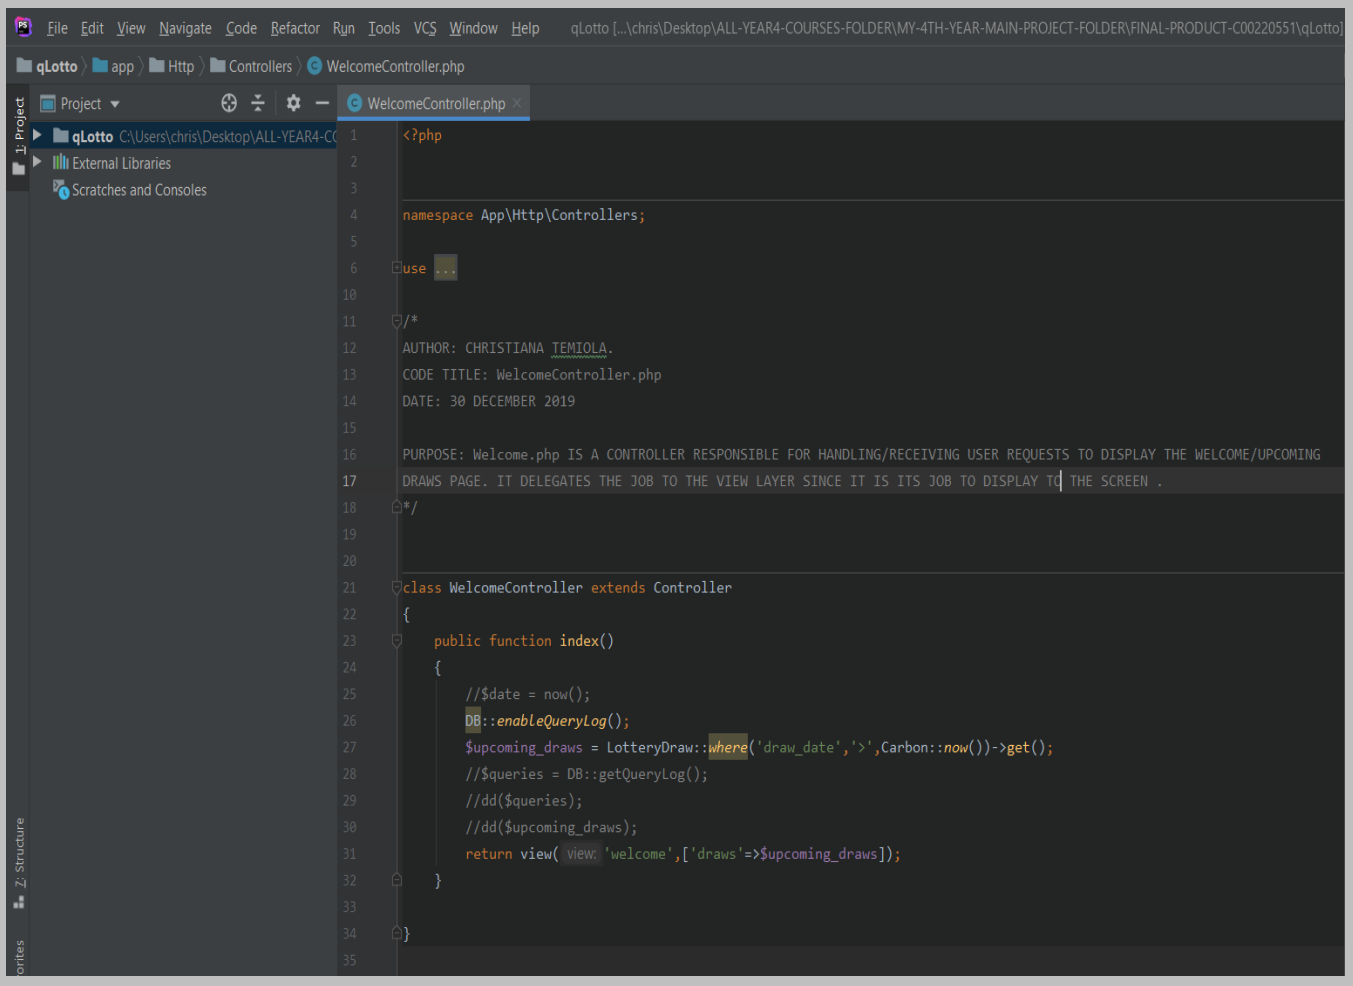
This code WAS WRITTEN BY ME and is located at: app > Http > Controllers > LotteryController.php





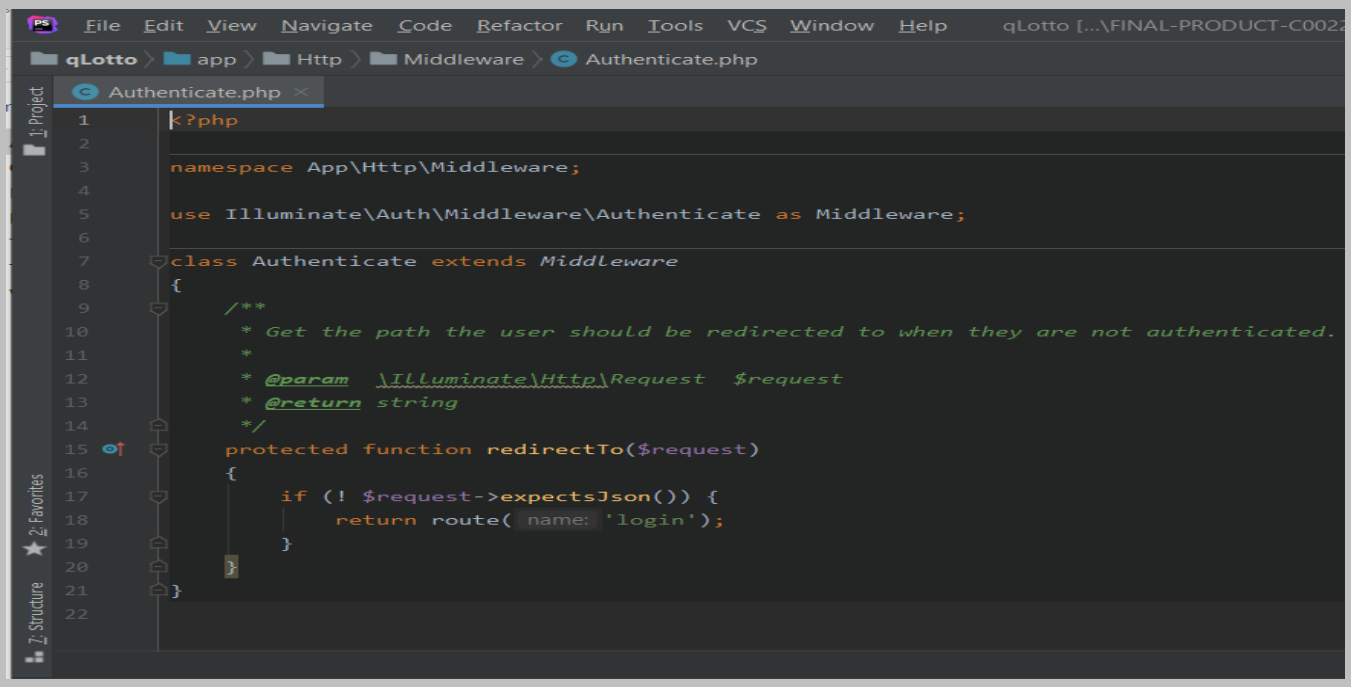
WelcomeController.php: It handles user requests to display the welcome/upcoming draws page. This task is then given to the view layer to deliver as appropriate.

This code WAS WRITTEN BY ME and is located at: app > Http > Controllers > WelcomeController.php



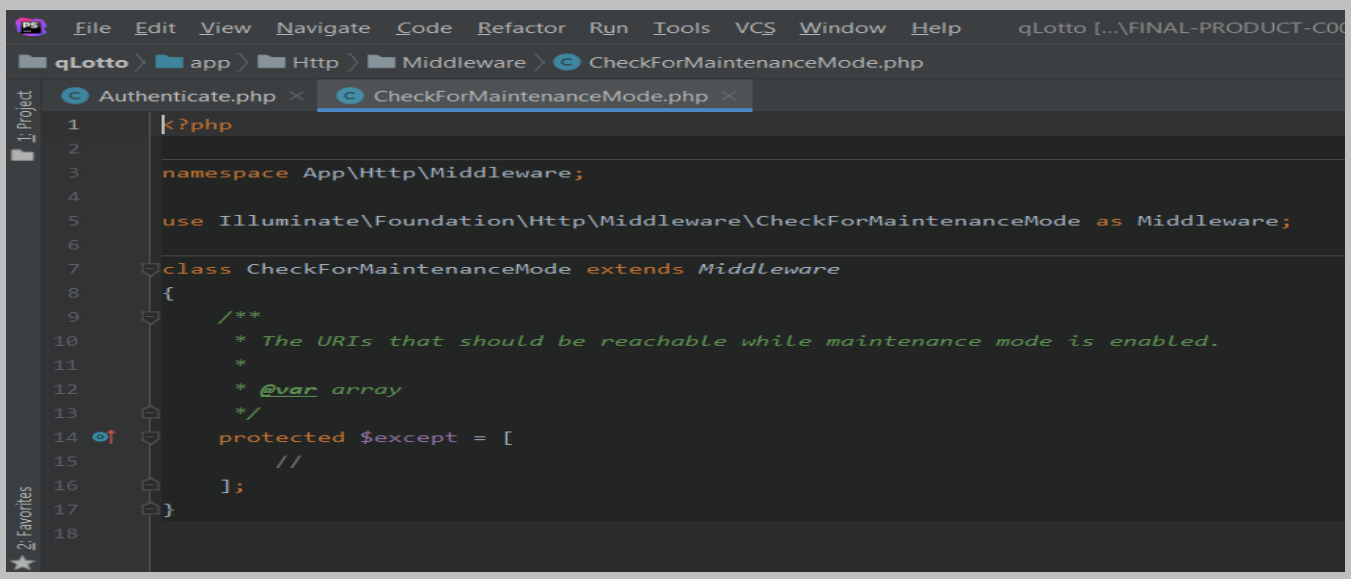
Authenticate.php: This piece of code deals with the path a user should be redirected to when they are not authenticated.

The file is located at: app > Http > Middleware > Authenticate.php



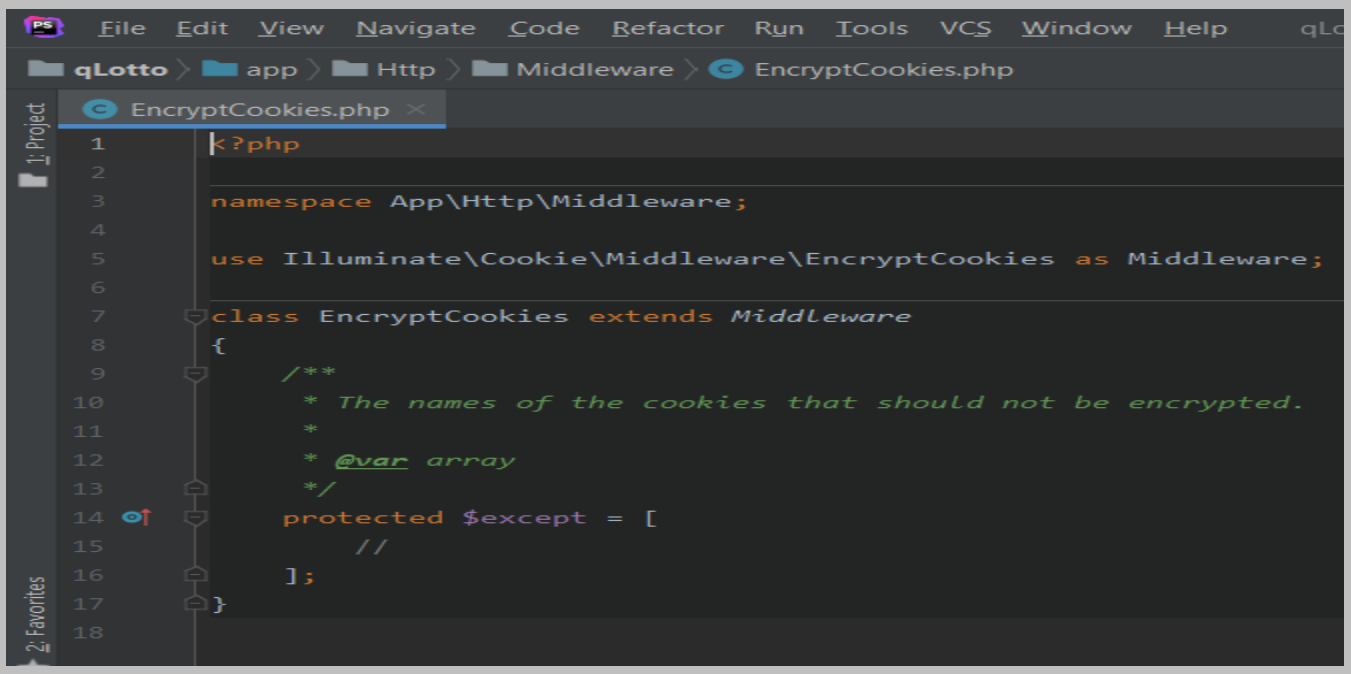
CheckForMaintenanceMode.php: This piece of code deals with the URIs that should be reachable while maintenance mode is enabled.

The file is located at: app > Http > Middleware > CheckForMaintenanceMode.php



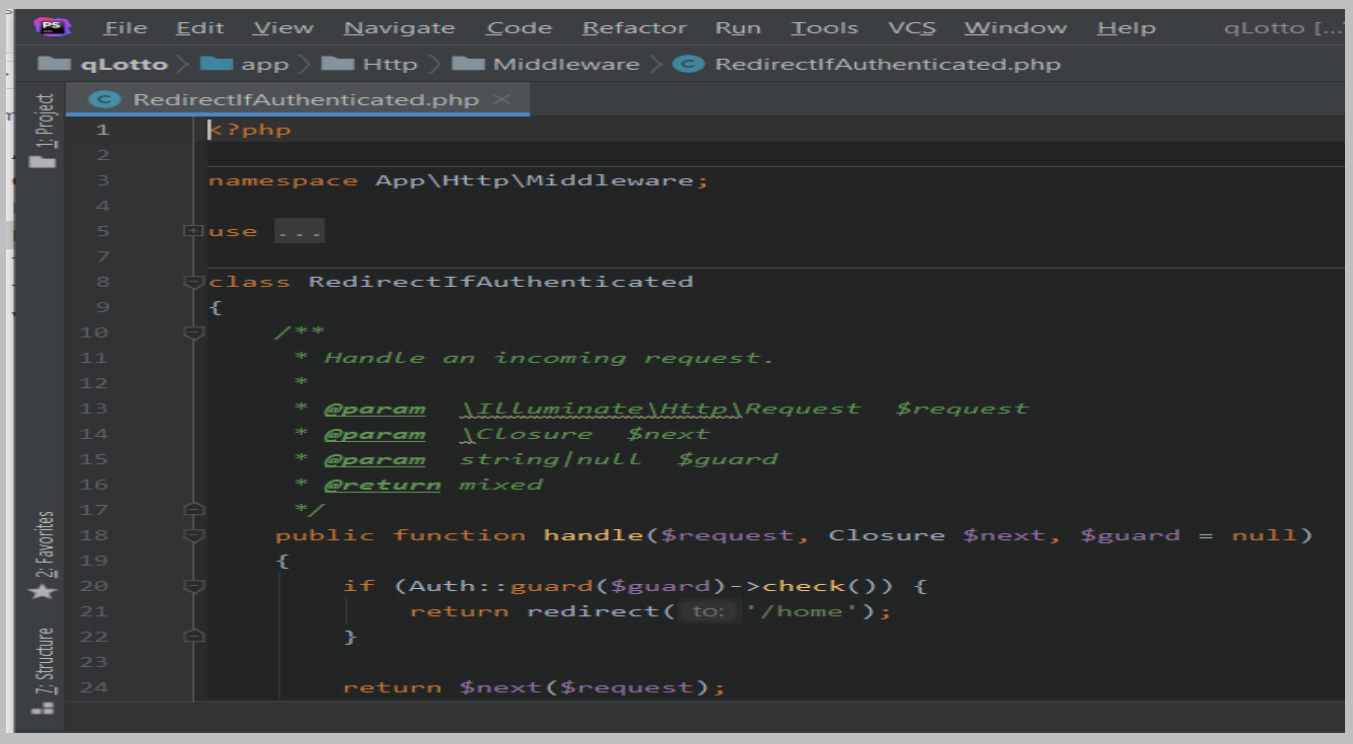
EncryptCookies.php: This piece of code deals with the names of cookies that should not be encrypted.

The file is located at: app > Http > Middleware > EncryptCookies.php



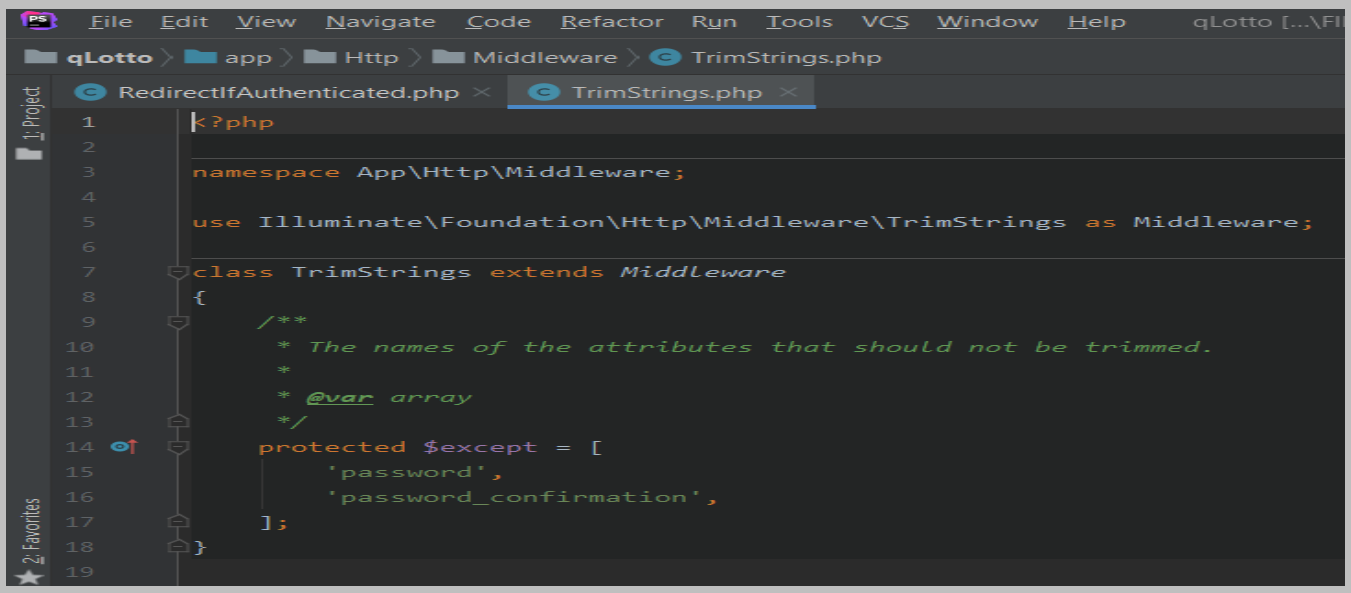
RedirectIfAuthenticated.php: This piece of code handles incoming requests.

The file is located at: app > Http > Middleware > RedirectIfAuthenticated.php



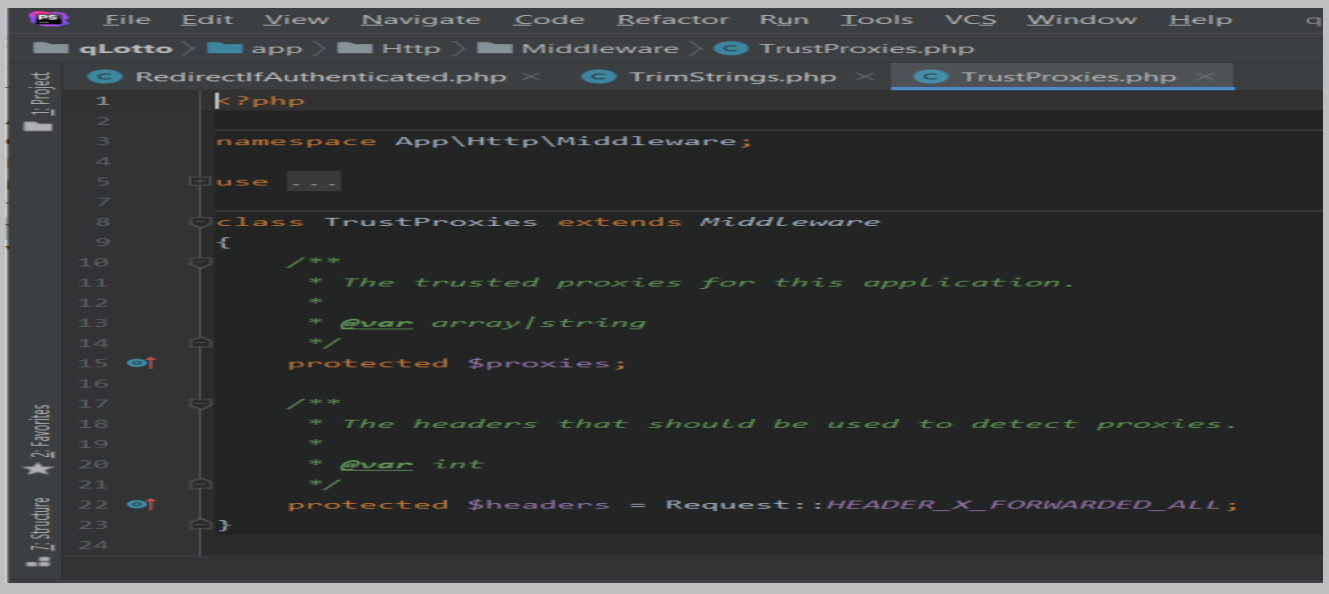
TrimStrings.php: This piece of code handles names of attributes that should not be trimmed. This means that whitespaces should not be removed in the listed attributes for example in password attribute, a user might use white spaces as part of his password so this field should be exempted from trimming.

The file is located at: app* > Http > Middleware > *TrimStrings.php



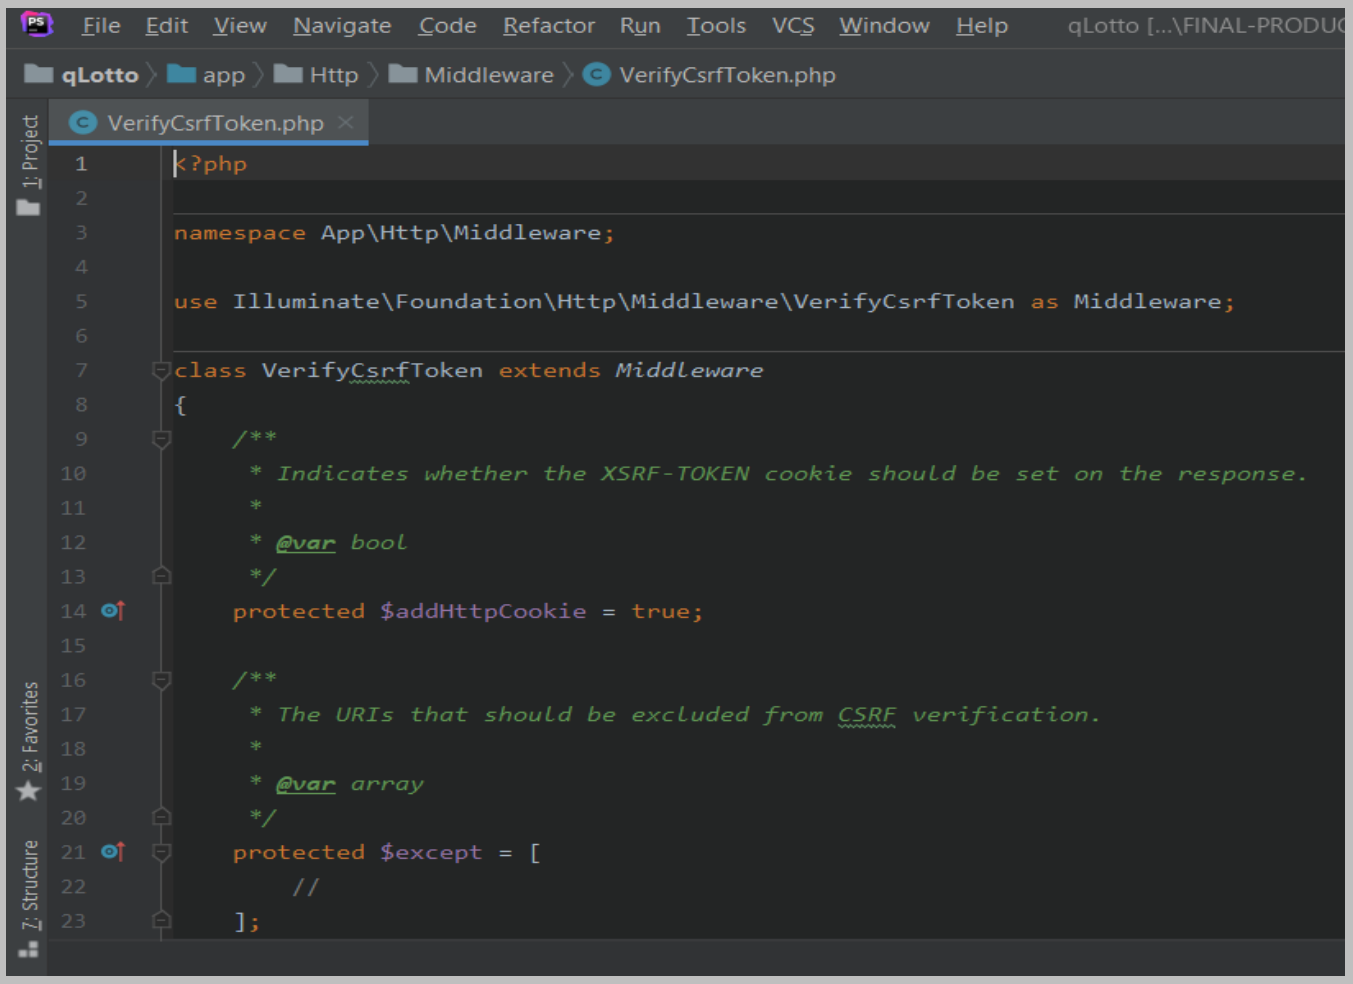
TrustProxies.php: This piece of code handles the trusted proxies for this application and the headers that should be used to detect proxies.

The file is located at: app* > Http > Middleware > *TrustProxies.php



VerifyCsrfToken.php: This piece of code handles CSRF verification. It indicates whether the XSRF_TOKEN cookie should be set on the response and also show the URIs that should be excluded from the verification.

The file is located at: app > Http > Middleware > VerifyCsrfToken.php



Kernel.php: This is the Http kernel. handles the artisan commands provided by the application. It is the application's global HTTP middleware stack which are run during every request to the application.

The file is located at: app > Http > Kernel.php

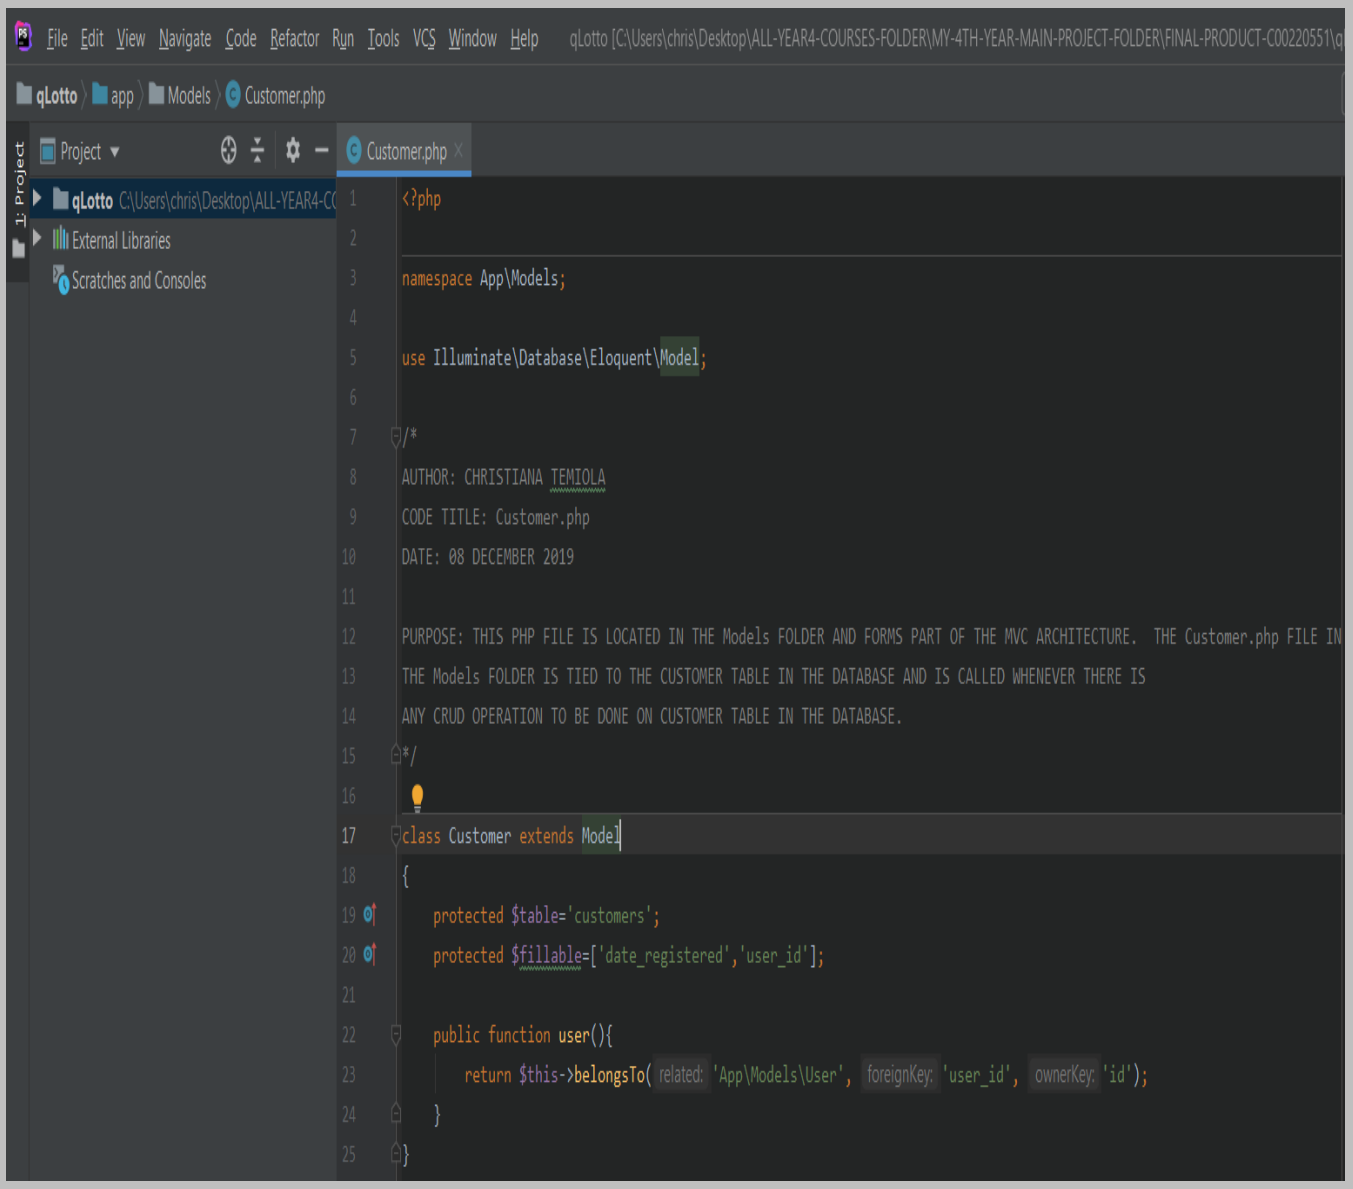
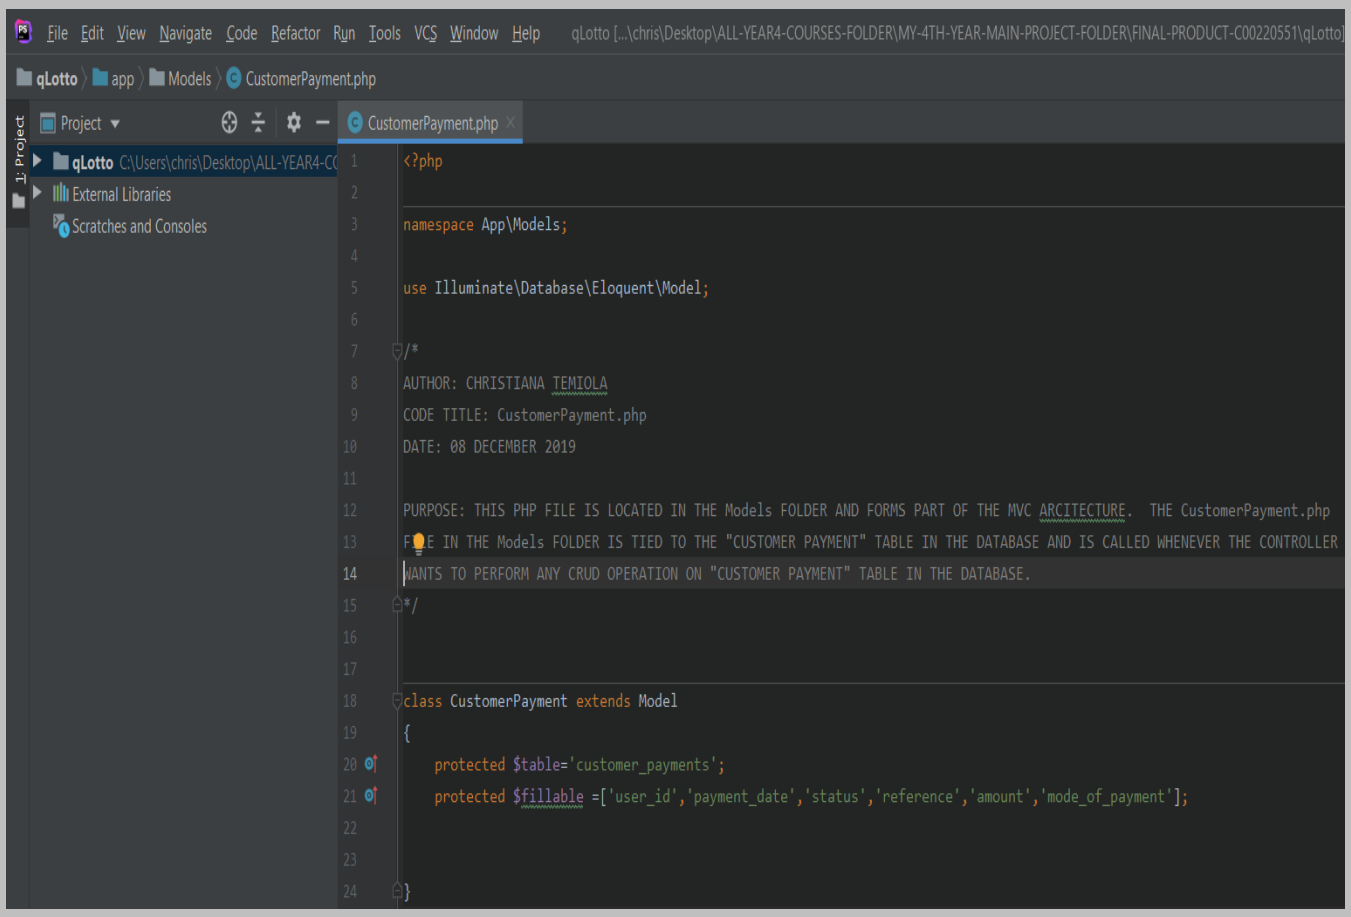
Customer.php: This file, located in the Models folder is tied to the customer table and the controller calls it when a CRUD operation is to be done. The Customer.php file is used to interact with the database table.

This code WAS WRITTEN BY ME and is located at: app > Models > Customer.php



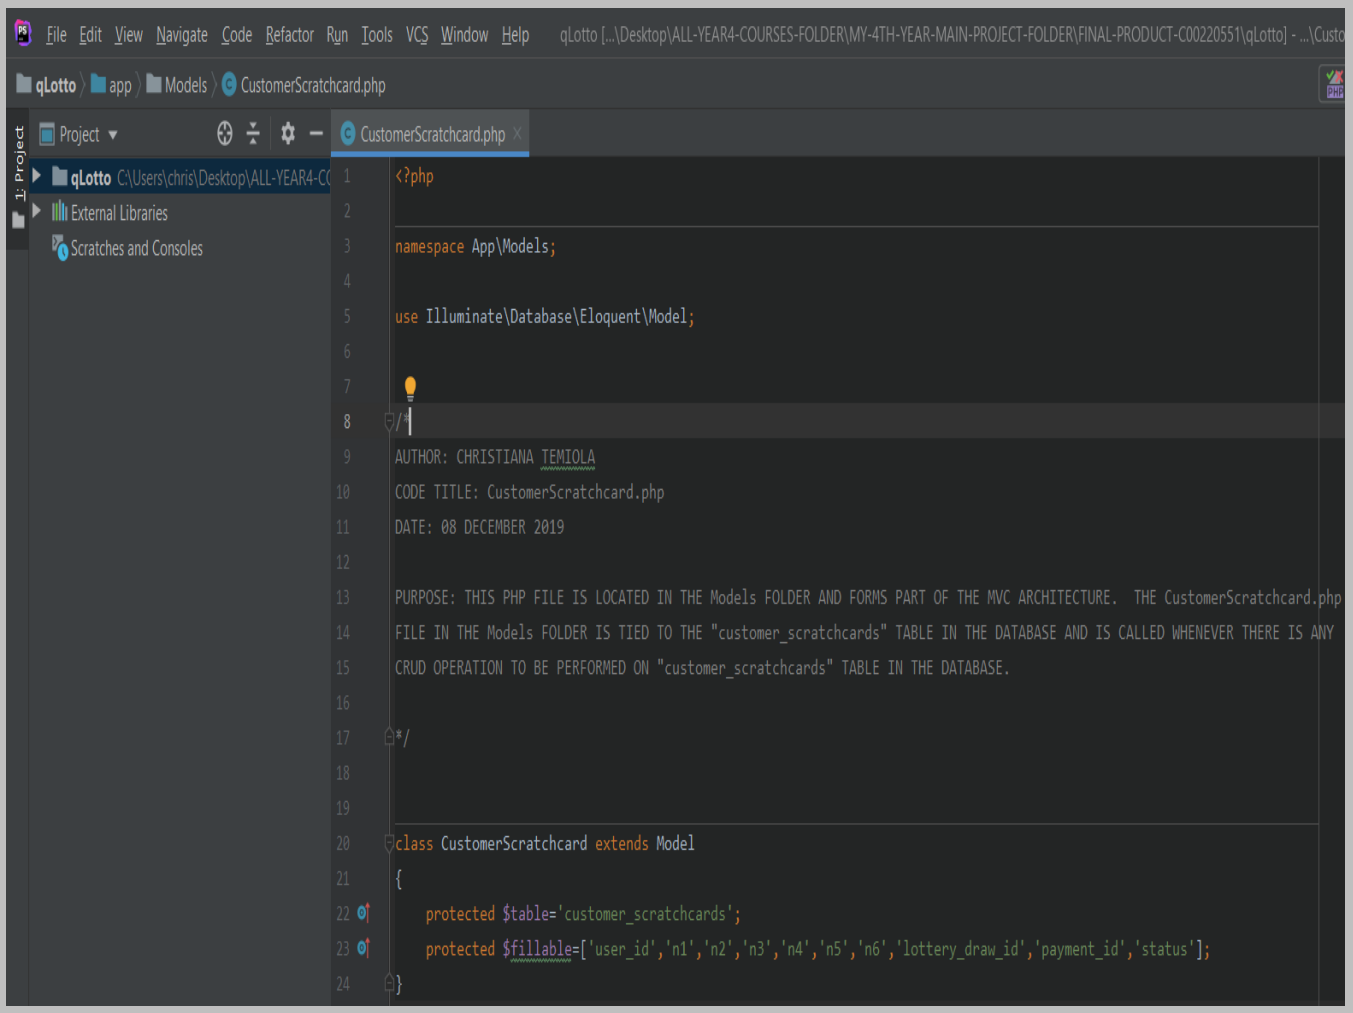
CustomerPayment.php: This code is written to allow customers/users make payments for scratch card tickets purchased. This file is tied to customer_payments table in the database and is called when there is any CRUD operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > CustomerPayment.php



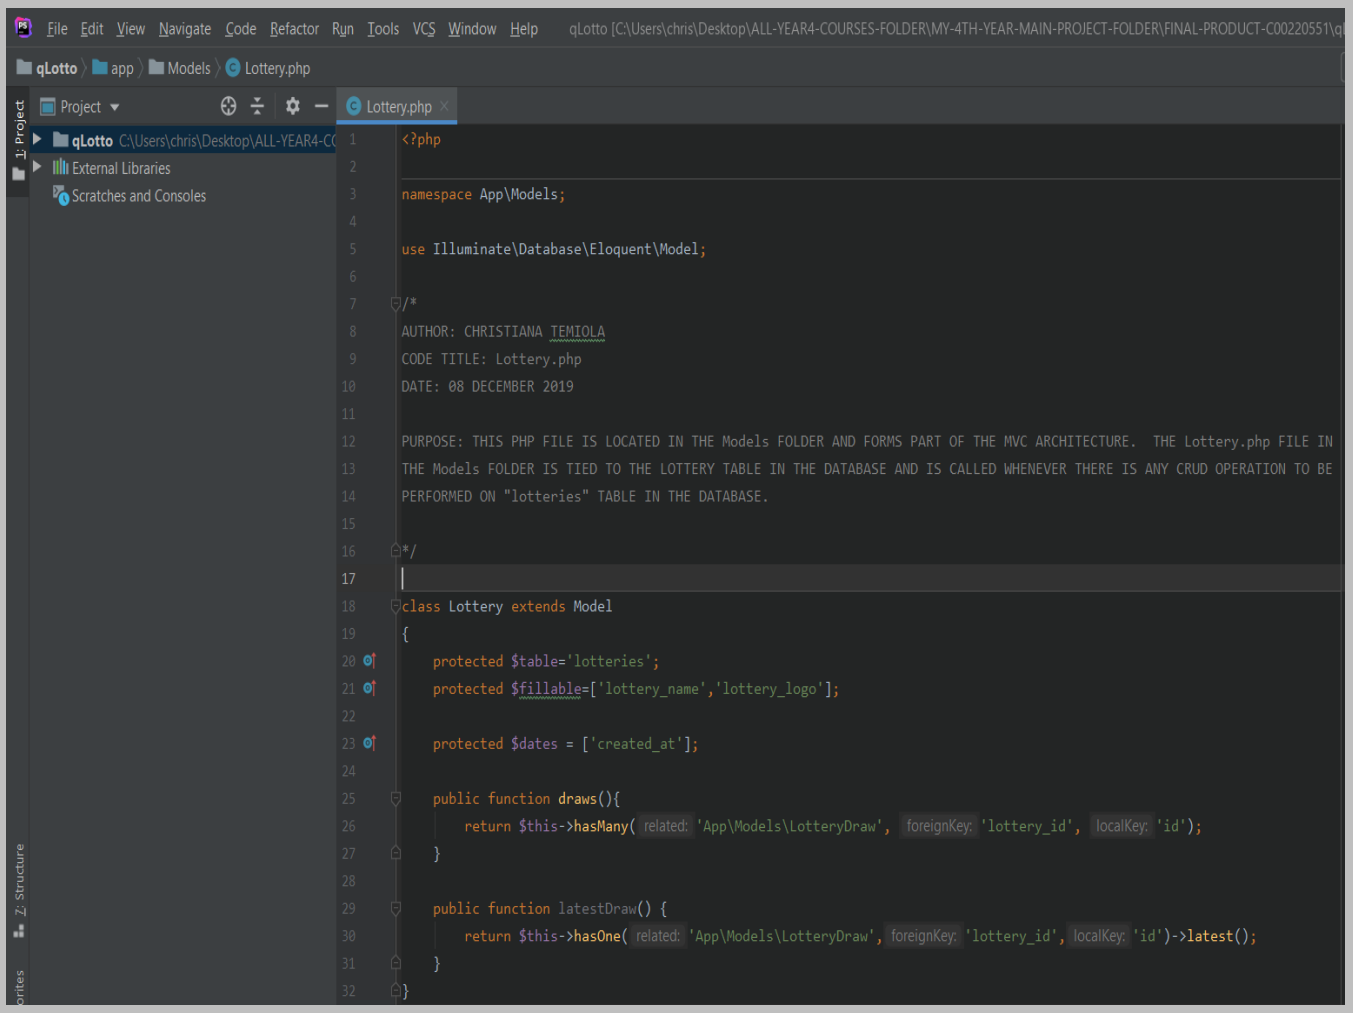
CustomerScratchcard.php: This piece of code is tied to the "customer_scratchcards" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > CustomerScratchcard.php



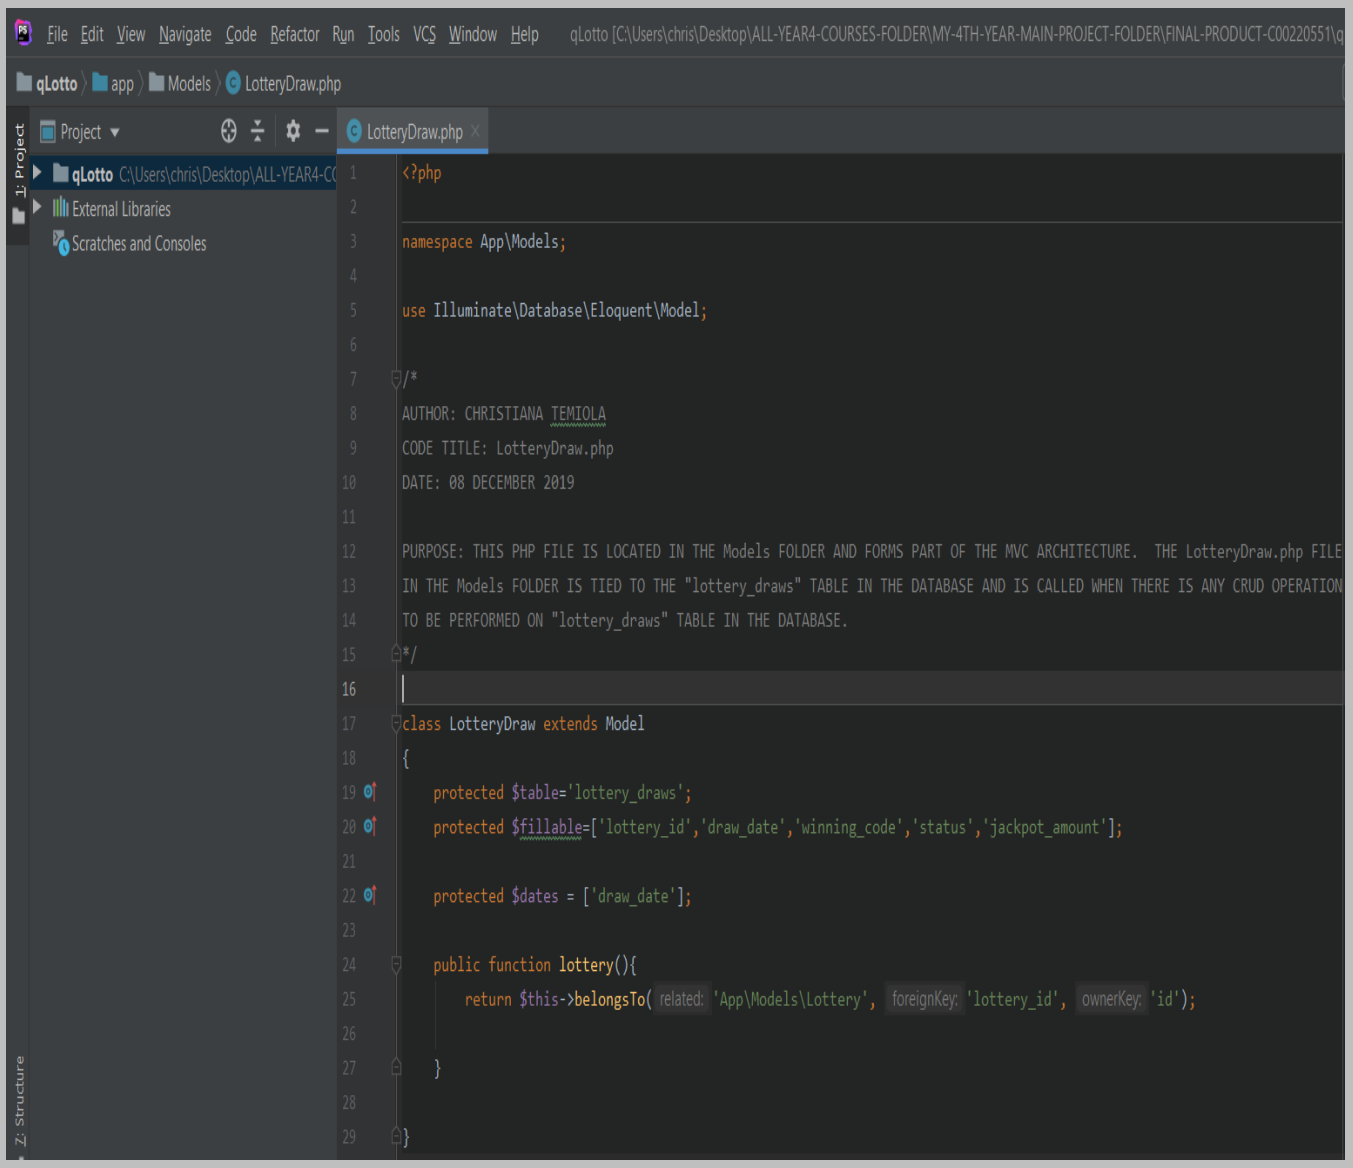
Lottery.php: This piece of code is tied to the "lotteries" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > Lottery.php



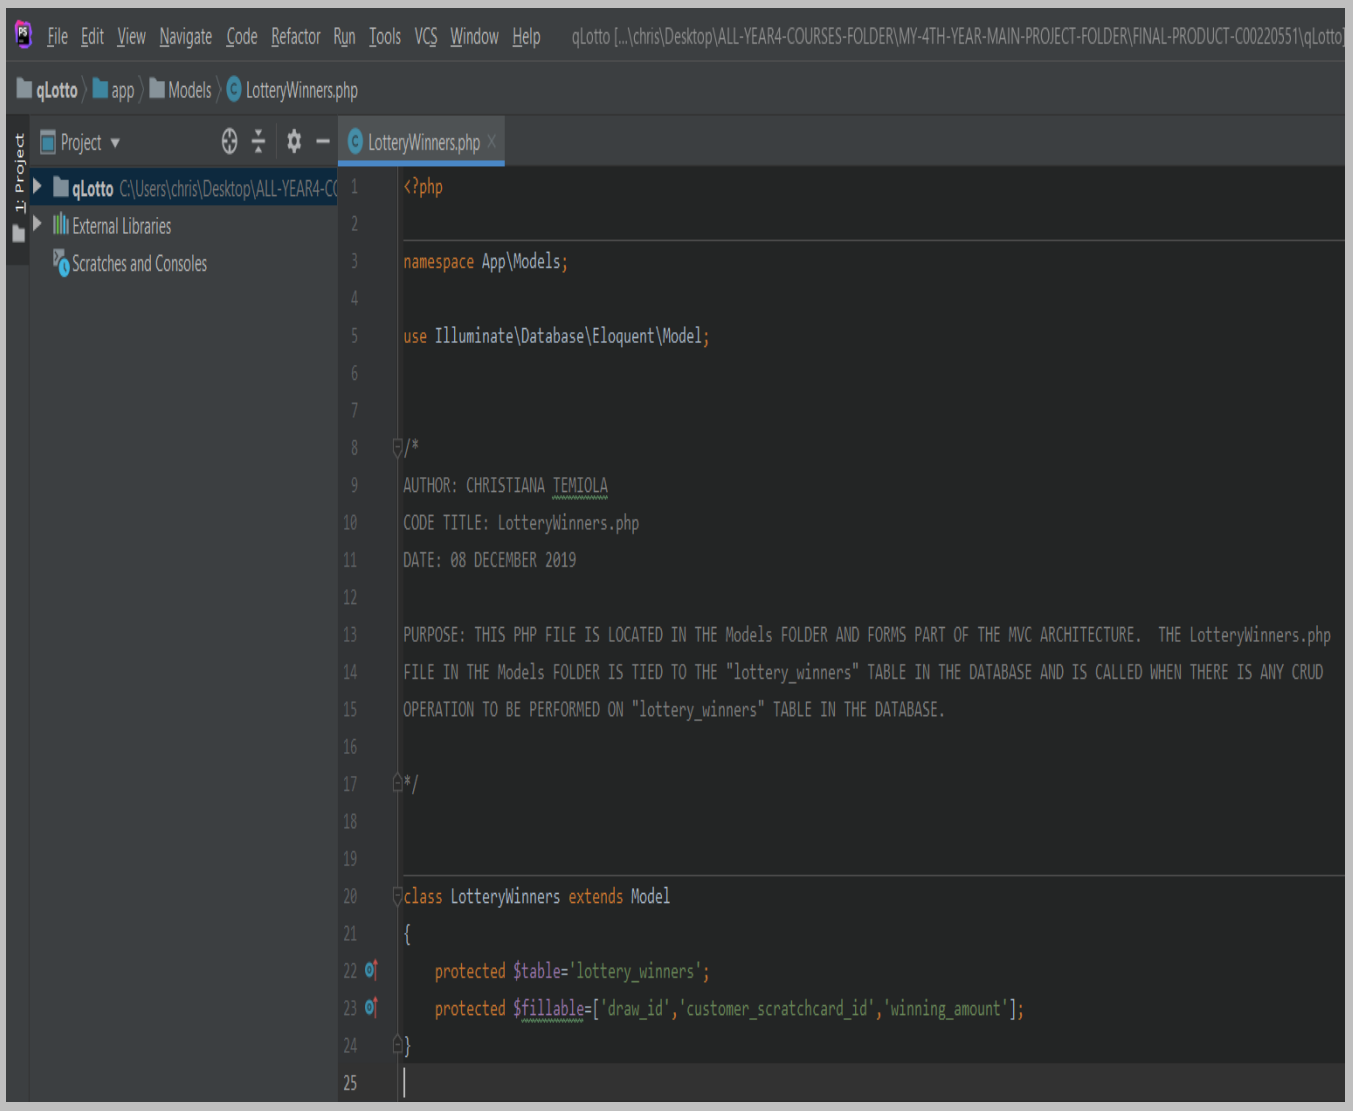
LotteryDraw.php: This piece of code is tied to the "lottery_draws" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "lottery_draws" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > LotteryDraw.php



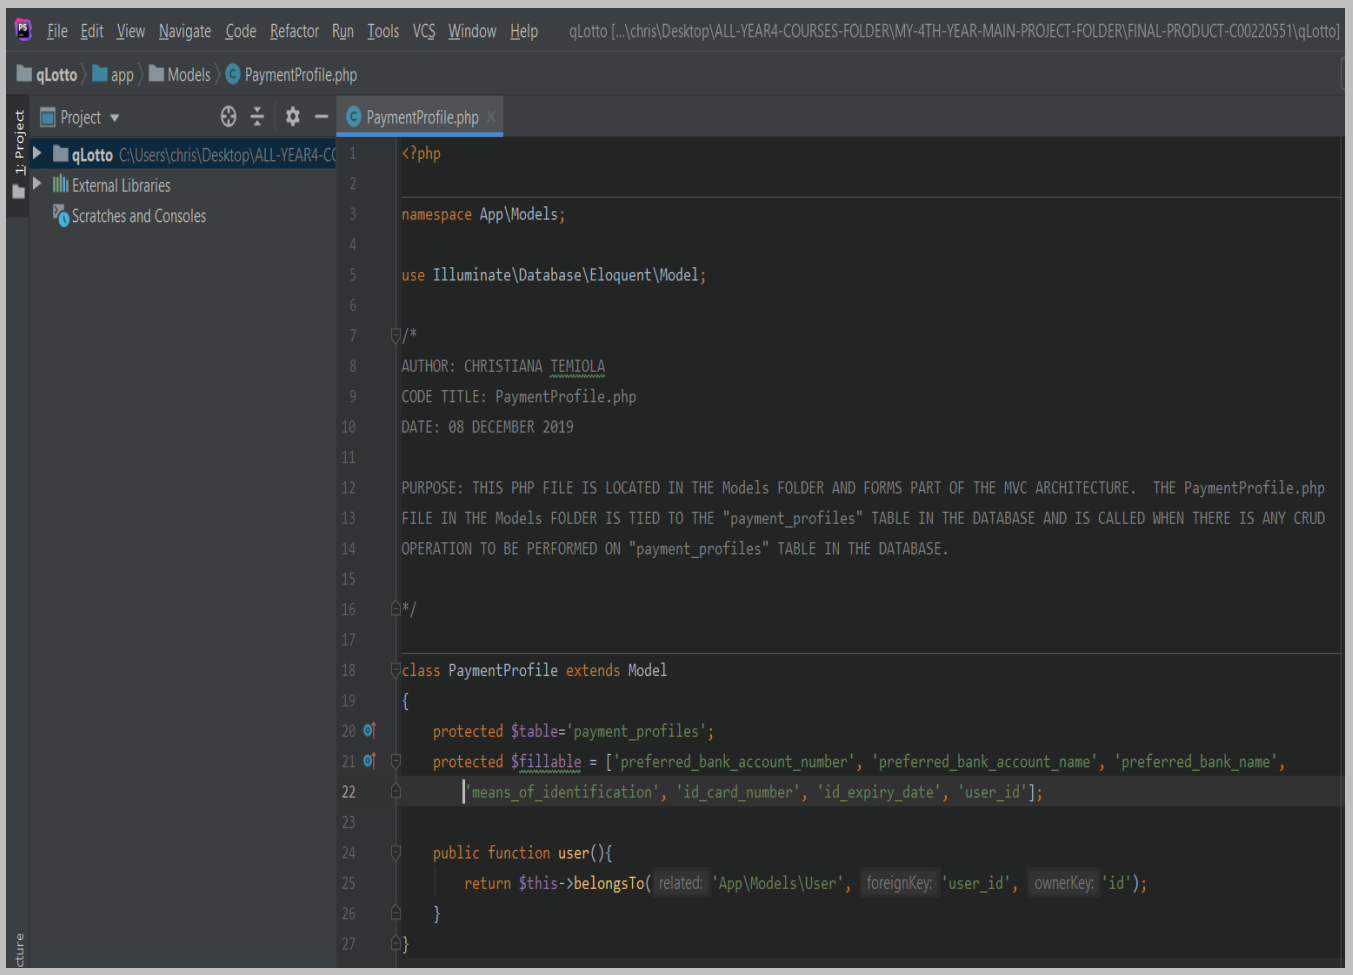
LotteryWinners.php: This piece of code is tied to the "lottery_winners" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "lottery_winners" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > LotteryWinners.php



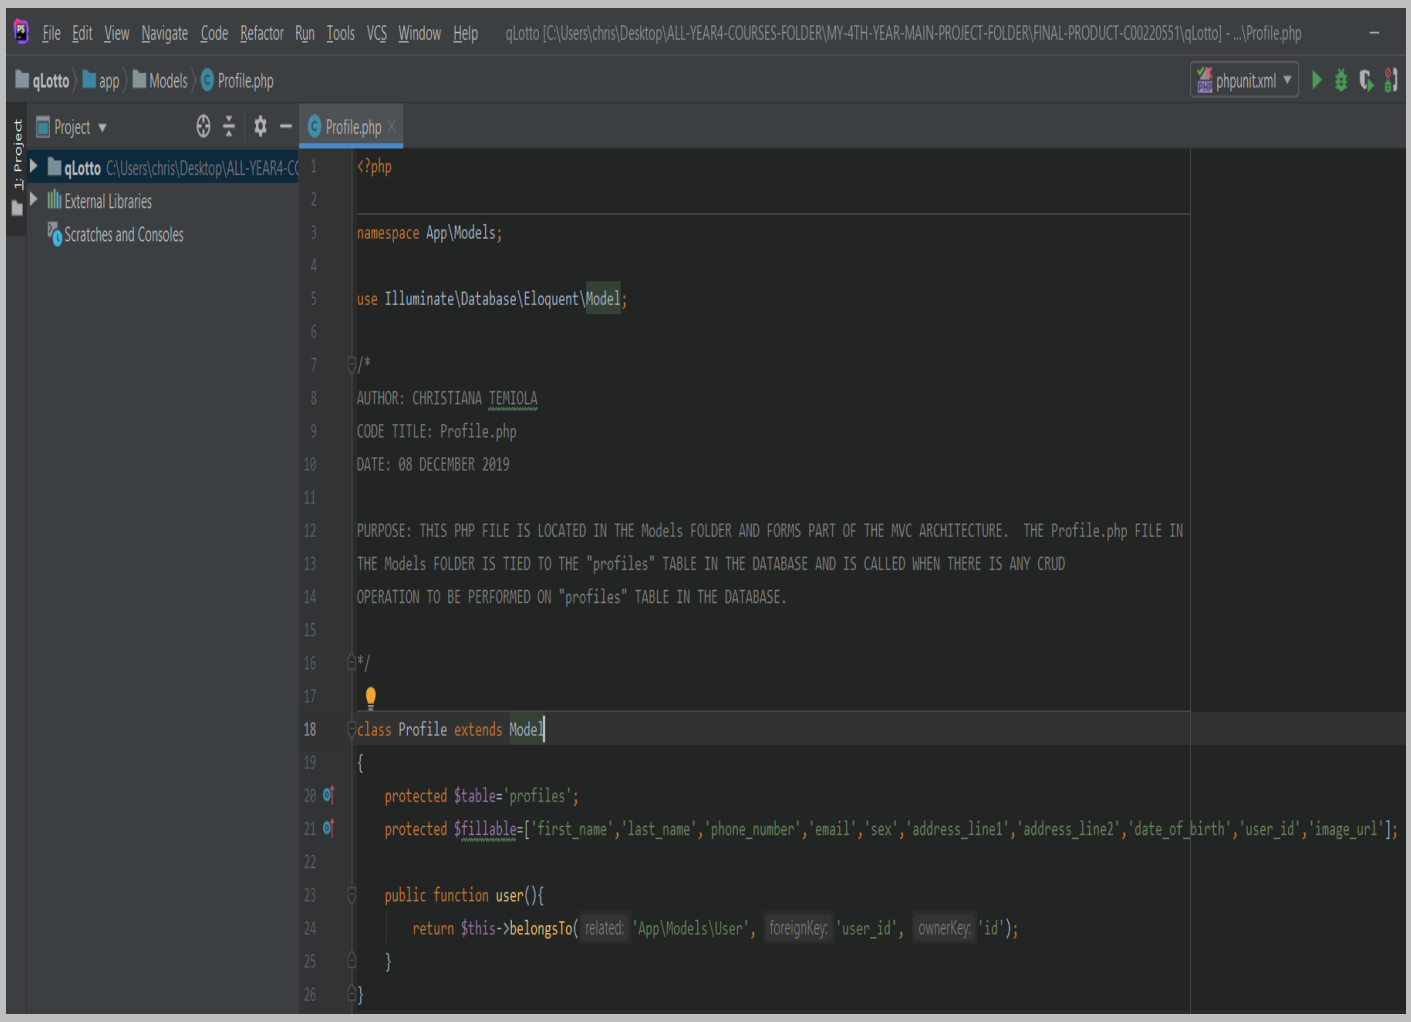
PaymentProfile.php: This piece of code is tied to the "payment_profiles" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "payment_profiles" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > PaymentProfile.php



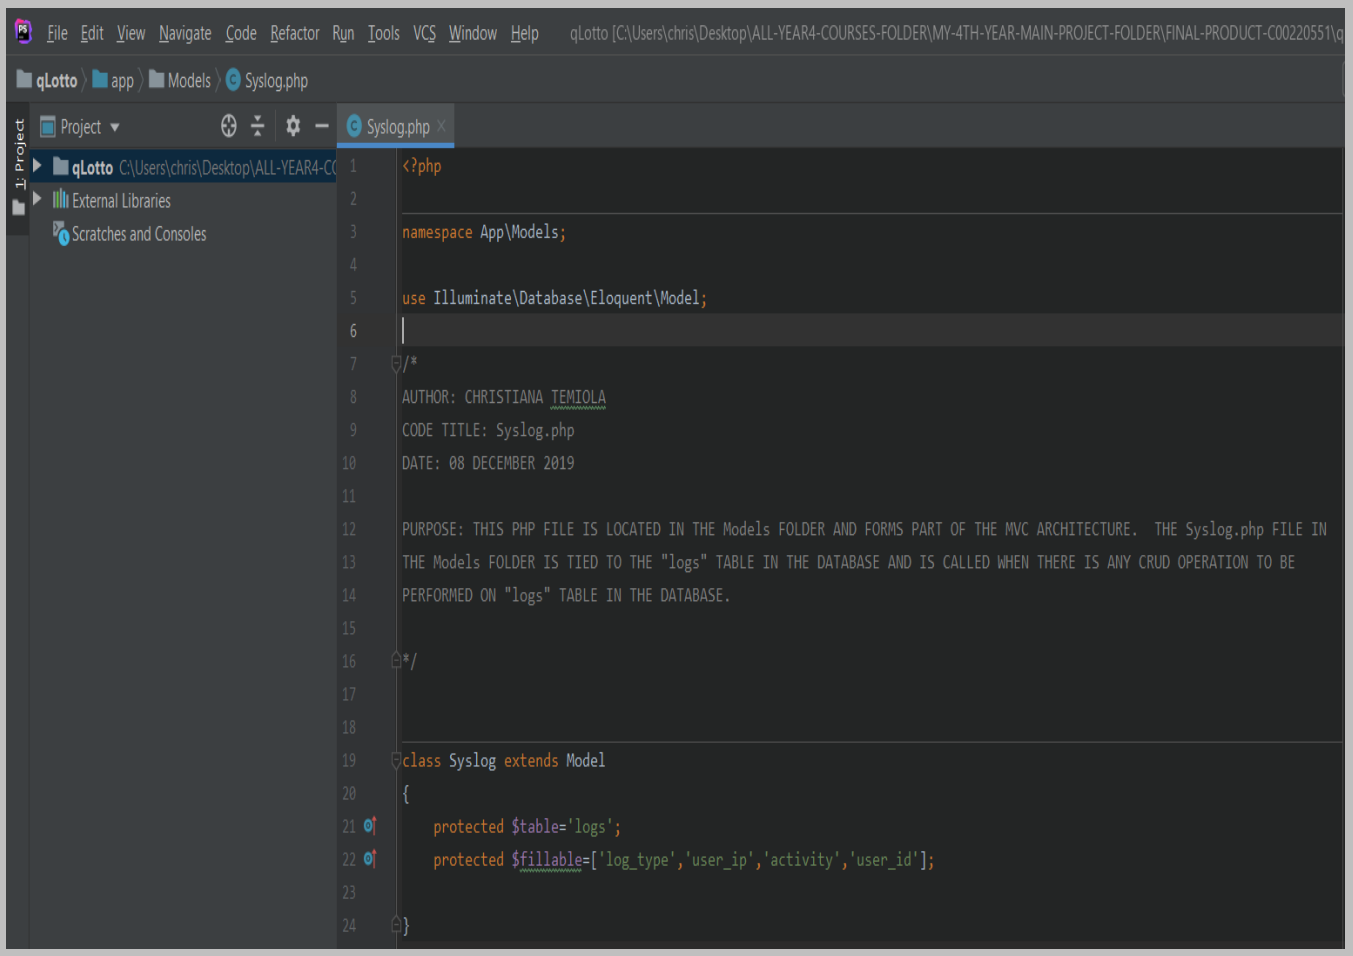
Profile.php: This code is tied to the "profiles" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "profiles" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > Profile.php



Syslog.php: This code is tied to the "logs" table in the database. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "logs" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > Syslog.php



User.php: This piece of code handles the categorization of user attributes into different forms e.g. attributes that are mass assignable, those that should be hidden for arrays and those that should be cast to native types. It is the Model layer of the MVC architecture responsible for carrying out CRUD operations on the "users" table so it is called when there is any of such operation to be carried out.

This code WAS WRITTEN BY ME and is located at: app > Models > User.php

finalize_draw.blade.php

```
<!--
AUTHOR: CHRISTIANA TEMIOLA
CODE TITLE: finalize_draw.blade.php
DATE: 01 APRIL 2020

PURPOSE: THE PURPOSE OF THIS PHP CODE IS TO DISPLAY A FORM PAGE WHEN A USER CLICKS ON THE "Finalize Draw" BUTTON.
IT CREATES THE VIEW (FORM SCREEN) FOR DISPLAYING THE GENERATED WINNING CODE TO AUTHORIZED ADMIN USERS ONLY AND GIVES HIM
THE OPTION TO EITHER APPROVE THE DRAW BY CLICKING ON THE "Approve Draw" BUTTON AND END THE GAME OR REDRAW BY CLICKING ON
THE "Redraw" BUTTON AS MANY TIMES AS HE WISHES TO GENERATE NEW WINNING CODE EACH TIME IN ORDER TO GIVE PLAYERS MORE CHANCE
TO WIN SO IT IS A PRIVILEGED VIEW LIMITED TO ADMIN USERS ONLY.  IT USES THE LARAVEL IN-BUILT TEMPLATE WHOSE CODE
CAN BE FOUND IN THE FOLDERS qlotto > resources > views > layouts > base.blade.php and I EXTENDED THE CODE IN THIS FILE
WITH ADDITIONAL CODES WRITTEN BY ME. THE FIRST LINE OF CODE ON LINE 18 REFERS TO THE LARAVEL LAYOUT TEMPLATE USED AND IT
NOTIFIES LARAVEL THAT THIS TEMPLATE CODE SHOULD BE INCLUDED WITH THE login.blade.php CODE, ALL OTHER LINES OF CODE IN
THIS FILE WERE WRITTEN BY ME.
